Listening Comprehension

Part A

DIRECTIONS: In Part A you will hear short conversations between two speakers. At the end of each conversation, a third speaker will ask a question about what the first two speakers said. Each conversation and each question will be spoken only one time. Therefore, you must listen carefully to understand what each speaker says. After you hear a conversation and the question, read the four choices and select the one that is the best answer to the question the speaker asked. Then, on your answer sheet, find the number of the question and blacken the space that corresponds to the letter for the answer you have chosen. Blacken the space completely so that the letter inside the space does not show.

Listen to the following example.

On the recording, you hear:

(Man) Does the car need to be filled?

(Woman) Mary stopped at the gas station on her way home.

(Narrator) What does the woman mean?

In your test book, you will read:

(A) Mary bought some food.

(B) Mary had car trouble.

(C) Mary went shopping.

(D) Mary bought some gas.

From the conversation you learn that Mary stopped at the gas station on her way home. The best answer to the question "Does the car need to be filled?" is (D), "Mary bought some gas." Therefore, the correct answer is (D).

Now let us begin Part A with question number 1.

Each lecture or conversation and each question will be spoken only one time. For this reason, you must listen carefully to understand what each speaker says. After you hear a question, read the four choices and select the one that best answers the question the speaker asked. Then, on your answer sheet, find the number of the question and blacken the space that contains the letter for the answer you have chosen. Answer all questions according to what is stated or implied in the lecture or conversation.

Listen to this sample talk.

You will hear:

Now listen, to the following example.

You will hear:

You will read:

- (A) By cars and carriages
- (B) By bicycles, trains, and carriages
- (C) On foot and by boat
- (D) On board ships and trains

The best answer to the question "According to the speaker, how did people travel before the invention of the automobile?" is (B), "By bicycles, trains, and carriages." Therefore, the correct answer is (B). You are not allowed to make notes during the test.

39.

- (A) Video rental business
- (B) Large motion picture studios
- (C) Vehicle rental agencies
- (D) Convenience and department stores

40.

- (A) Between 300 and 600
- (B) Between 5,000 and 7,000
- (C) Approximately 60,000
- (D) Over 90,000

Structure and Written Expression

Sentence Completion

This section is designed to test your ability to recognize language structures that are appropriate in standard written English. The questions in this section belong to two types, each of which has special directions.

DIRECTIONS: Questions 1-15 are partial sentences. Below each sentence you will see four words or phrases, marked (A), (B), (C), and (D). Select the one word or phrase that best completes the sentence. Then, on your answer sheet, find the number of the question and fill in the space that contains the letter for the answer you have chosen. Fill in the space completely.

EXAMPLE I

Drying flowers is the best way.....them.

- (A) to preserve
- (B) by preserving
- (C) preserve
- (D) preserved

The sentence should state, "Drying flowers is the best way to preserve them." Therefore, the correct answer is (A).

EXAMPLE II

Many American universities.....as small, private colleges.

- (A) begun
- (B) beginning
- (C) began
- (D) for the beginning

The sentence should state, "Many American universities began as small, private colleges." Therefore, the correct answer is (C). After you read the directions, begin work on the questions.

37. As the sign(A)languages of the deaf(B)show, the sounds(C)of speech are not required to expressing(D)meaningful structures.
38. In 1831, English physicist(A), Michael Faraday, discovered the principle of(B)electromagnetic induction, which the(C)electric motor and the electric generator are based(D).
39. Aspiring to(A)eliminate slavery entirely(B), Francois Toussaint organized an army consisting mostly of(C)illiterate slaves into a power(D)military force.
40. The human(A)rib cage protects the lungs and the heart allows(B)the chest to expand(C)and contract easily(D).

Reading Comprehension

Time 55 minutes

DIRECTIONS: In this section you will read several passages. Each passage is followed by a series of questions. For questions 1-50, you need to select the best answer, (A), (B), (C), or (D), to each question. Then, on your answer sheet, find the number of the question and fill in the space that contains the letter of the answer you have selected. Fill in the space completely. Answer all questions following a passage on the basis of what is stated or implied in the passage.

Read the following passage:

A tomahawk is a small ax used as a tool and a weapon by the North American Indian tribes. An average tomahawk was not very long and did not weigh a great deal. Originally, the head of the tomahawk was made of a shaped stone or an animal bone and was mounted on a wooden handle. After the arrival of the European settlers, the Indians began to use tomahawks with iron heads. Indian males and females of all ages used tomahawks to chop and cut wood, pound stakes into the ground to put up wigwams, and do many other chores. Indian warriors relied on tomahawks as weapons and even threw them at their enemies. Some types of tomahawks were used in religious ceremonies. Contemporary American idioms reflect this aspect of American heritage.

EXAMPLE I

Early tomahawk heads were made of

- (A) stone or bone
- (B) wood or sticks
- (C) European iron
- (D) religious weapons

According to the passage, early tomahawk heads were made of stone or bone. Therefore, the correct answer is (A).

EXAMPLE II

How has the Indian use of tomahawks affected American daily life today?

- (A) Tomahawks are still used as weapons.
- (B) Tomahawks are used as tools for certain jobs.
- (C) Contemporary language refers to tomahawks.
- (D) Indian tribes cherish tomahawks as heirlooms.

The passage states, "Contemporary American idioms reflect this aspect of American heritage." The correct answer is (C). After you read the directions, begin work on the questions.

Questions 1-12

In the course of history, human inventions have dramatically increased the average amount of energy available for use per person. Primitive peoples in cold regions burned wood and animal dung to heat their caves, cook food, and drive off animals by fire. The first step toward the developing of more efficient fuels was taken when people discovered that they could use vegetable oils and animal fats in lieu of gathered or cut wood. Charcoal gave off a more intensive heat than wood and was more easily obtainable than organic fats. The Greeks first began to use coal for metal smelting in the 4th century, but it did not come into extensive use until the Industrial Revolution.

In the 1700s, at the beginning of the Industrial Revolution, most energy used in the United States and other nations undergoing industrialization was obtained from perpetual and renewable sources, such as wood, water streams, domesticated animal labor, and wind. These were predominantly locally available supplies. By mid-1800s, 91 percent of all commercial energy consumed in the United States and European countries was obtained from wood. However, at the beginning of the 20th century, coal became a major energy source and replaced wood in industrializing countries. Although in most regions and climate zones wood was more readily accessible than coal, the latter represents a more concentrated source of energy. In 1910, natural gas and oil firmly replaced coal as the main source of fuel

because they are lighter and, therefore, cheaper to transport. They burned more cleanly than coal and polluted less. Unlike coal, oil could be refined to manufacture liquid fuels for vehicles, a very important consideration in the early 1900s, when the automobile arrived on the scene.

By 1984, nonrenewable fossil fuels, such as oil, coal; and natural gas, provided over 82 percent of the commercial and industrial energy used in the world. Small amounts of energy were derived from nuclear fission, and the remaining 16 percent came from burning direct perpetual and renewable fuels, such as biomass. Between 1700 and 1986, a large number of countries shifted from the use of energy from local sources to a centralized generation of hydropower and solar energy converted to electricity. The energy derived from nonrenewable fossil fuels has been increasingly produced in one location and transported to another, as is the case with most automobile fuels. In countries with private, rather than public transportation, the age of nonrenewable fuels has created a dependency on a finite resource that will have to be replaced.

Alternative fuel sources are numerous, and shale oil and hydrocarbons are just two examples. The extraction of shale oil from large deposits in Asian and European regions has proven to be labor consuming and costly. The resulting product is sulfur- and nitrogen-rich, and large-scale extractions are presently prohibitive. Similarly, the extraction of hydrocarbons from tar sands in Alberta and Utah is complex. Semi-solid hydrocarbons cannot be easily separated from the sandstone and limestone that carry them, and modern technology is not sufficiently versatile for a large-scale removal of the material. However, both sources of fuel may eventually be needed as petroleum prices continue to rise and limitations in fossil fuel availability make alternative deposits more attractive,

1. What is the main topic of the passage?

- (A) Applications of various fuels
- (B) Natural resources and fossil fuels
- (C) A history of energy use
- (D) A historical overview of energy rates

2. In line 2, the phrase "per person" is closest in meaning to

- (A) per capita
- (B) per year
- (C) per family
- (D) per day

3. It can be inferred from the first paragraph that

- (A) coal mining was essential for primitive peoples
- (B) the Greeks used coal in industrial production
- (C) the development of efficient fuels was a gradual process
- (D) the discovery of efficient fuels was mostly accidental

4. In line 5, the phrase "in lieu" is closest in meaning to

- (A) in spite
- (B) in place
- (C) in every way

(D) in charge

5. The author of the passage implies that in the 1700s, sources of energy were

- (A) used for commercial purposes
- (B) used in various combinations
- (C) not derived from mineral deposits
- (D) not always easy to locate

6. In line 16, the phrase "the latter" refers to

- (A) wood
- (B) coal
- (C) most regions
- (D) climate zones

7. In line 18, the word "They" refers to

- (A) coal and wood
- (B) main sources of fuel
- (C) natural gas and oil
- (D) industrializing countries

8. According to the passage, what was the greatest advantage of oil as fuel?

- (A) It was a concentrated source of energy.
- (B) It was lighter and cheaper than coal.
- (C) It replaced wood and coal and reduced pollution.
- (D) It could be converted to automobile fuel.

9. According to the passage, the sources of fossil fuels will have to be replaced because

- (A) they need to be transported
- (B) they are not efficient
- (C) their use is centralized.
- (D) their supply is limited

10. It can be inferred from the passage that in the early 20th century, energy was obtained primarily from

- (A) fossil fuels
- (B) nuclear fission
- (C) hydraulic and solar sources
- (D) burning biomass

11. The author of the passage implies that alternative sources of fuel are currently

- (A) being explored

- (B) being used for consumption
- (C) available in few locations
- (D) examined on a large scale

12. In line 35, the word "prohibitive" is closest in meaning to

- (A) prohibited
- (B) provided
- (C) too expensive
- (D) too expedient

Questions 13-23

Most forms of property are concrete and tangible, such as houses, cars, furniture, or anything else that is included in one's possessions. Other forms of property can be intangible, and copyright deals with intangible forms of property. Copyright is a legal protection extended to authors of creative works, for example, books, magazine articles, maps, films, plays, television shows, software, paintings, photographs, music, choreography in dance, and all other forms of intellectual or artistic property.

Although the purpose of artistic property is usually public use and enjoyment, copyright establishes the ownership of the creator. When a person buys a copyrighted magazine, it belongs to this individual as a tangible object. However, the authors of the magazine articles own the research and the writing that went into creating the articles. The right to make and sell or give away copies of books or articles belongs to the authors, publishers, or other individuals or organizations that hold the copyright. To copy an entire book or a part of it, permission must be received from the copyright owner, who will most likely expect to be paid. Copyright law distinguishes between different types of intellectual property. Music may be played by anyone after it is published. However, if it is performed for profit, the performers need to pay a fee, called a royalty. A similar principle applies to performances of songs and plays. On the other hand, names, ideas, and book titles are excepted. Ideas do not become copyrighted property until they are published in a book, a painting, or a musical work. Almost all artistic work created before the 20th century is not copyrighted because it was created before the copyright law was passed.

The two common ways of infringing upon the copyright are plagiarism and piracy. Plagiarizing the work of another person means passing it off as one's own. The word plagiarism is derived from the Latin *plagiarius*, which means "abductor." Piracy may be an act of one person but, in many cases, it is a joint effort of several people who reproduce copyrighted material and sell it for profit without paying royalties to the creator. Technological innovations have made piracy easy, and anyone can duplicate a motion picture on videotape, a computer program, or a book. Video cassette recorders can be used by practically anyone to copy movies and television programs, and copying software has become almost as easy as copying a book. Large companies zealously monitor their copyrights for slogans, advertisements, and brand names, protected by a trademark.

13. What does the passage mainly discuss?

Questions 24-33

The official residence of the president of the United States is the White House, located at 1600 Pennsylvania Avenue, in Washington, D.C. The Commissioners of the District of Columbia held a meeting in 1792 and decided to hold a contest for the best design for the Presidential House. James Hoban, an architect born in Ireland, was the winner. His bid for the construction of the mansion asked for \$200,000, but the final cost of the building came to twice that amount. The work on the project began during the same year, and the grounds of approximately one and a half miles west of the Capitol Hill were chosen by Major Pierre-Charles L'Enfant, who was in charge of city planning. However, the construction continued for several more years, and George Washington had stepped down as president before the building was habitable. When John Adams, the second president of the United States and his wife Abigail moved in in 1800, only six rooms had been completed.

The grey sandstone walls of the house were painted white during construction, and the color of the paint gave the building its name. The building was burned on August 24, 1814, and James Hoban reconstructed the house for President James Monroe and his family, who moved there in 1817. The north portico was added to the building in 1829, water pipes were installed in 1833, gas lighting in 1848, and electricity in 1891. In 1948, inspectors announced that the building was so dilapidated that it was beyond repair and suggested that it was cheaper to construct a new one than repair the existing dwelling. However, the national sentiment was to keep the original form intact, and Congress appropriated \$5.4 million dollars for repairs. In 1961, Jacqueline Kennedy launched a program to redecorate the rooms and appointed a Fine Arts Committee to make choices of furnishing and colors.

The house of the president accords its residents a great deal of space. The living quarters contain 107 rooms, 40 corridors, and 19 baths. The White House contains a doctor's suite, a dentist's office, a large solarium, a broadcasting room, and a two-floor basement for storage and service rooms. The office in which the president works is not located in the White House, but in a separate building called the West Wing. The White House stands on 16

acres of parklike land and overlooks a broad lawn, flower gardens, and wood groves.

24. In line 3, the word "contest" is closest in meaning to

- (A) hearir
- (B) concourse
- (C) competition
- (D) computation

25. What does the passage imply about the cost of the White House construction?

- (A) It was proposed at the meeting of the commissioners.
- (B) It did not adhere to the original estimate.
- (C) It was not included in the architectural design.
- (D) It was considered excessive for the presidential home.

26. In line 6, the word "grounds" is closest in meaning to

- (A) high ground
- (B) several lots
- (C) site
- (D) hills

27. It can be inferred from the passage that

- (A) George Washington often used the White House steps
- (B) George Washington contributed to the White House design
- (C) George Washington never lived in the White House
- (D) The White House was excluded from the city planning

28. The author of the passage implies that the construction of the main White House building continued

- (A) up to 1800
- (B) after 1800
- (C) until 1814
- (D) until 1792

29. In line 17, the word "dilapidated" is closest in meaning to

- (A) ornate
- (B) run-down
- (C) old-fashioned
- (D) obscure

30. What can be inferred about the White House from the information in the second paragraph?

- (A) Few changes occurred in the structure in the first half of the 20th century.
- (B) The building was modernized extensively during one decade.

- (C) Running water was installed in the second half of the 19th century.
- (D) Each president added new features to the building's conveniences.

31. In line 19, the word "appropriated" is closest in meaning to

- (A) accumulated
- (B) accosted
- (C) authorized
- (D) aggrandized

32. In line 20, the word "launched" is closest in meaning to

- (A) lauded
- (B) lavished
- (C) began
- (D) requested

33. The passage mentions all of the following White House premises EXCEPT

- (A) hallways
- (B) kitchen
- (C) medical offices
- (D) storage rooms

Questions 34-42

The organization of the family system in the United States emphasizes monogamy, neolocal residence, an extended family linkage, and a relatively free choice in the selection of mates. Compared to those in many other countries, American families are usually small and isolated. Family and marital roles for men and women overlap considerably, with little differentiation. Marriage and divorce rates are high, and, according to demographic estimates, 95 percent or more of the adult population marry in the course of their lives. The rise in the divorce and remarriage rates has made definitions of family increasingly complex, although several basic patterns have remained stable.

The smallest family consists of two persons: a husband and a wife, a parent and a child, or a sister and a brother. Nuclear families include two or more persons who are related by marriage, blood, or adoption and who share a common household. A wide range of appropriate kinship patterns have developed in the past two decades, but marriage, an exclusive relationship between two people, is predominant. The only norm that is universally recognized by the society and by law permits a person to have only one spouse in a monogamous family. Serial monogamy has become ubiquitous, and it assumes that persons can have more than one spouse in the course of their lives, as long as there is only one spouse at a time.

Social norms pertaining to the choice of marriage partners prescribe appropriate and unacceptable characteristics. Most societies, including the U.S., grant acceptance to endogamous partners who marry within their own racial, ethnic, socioeconomic, educational, age, and religious groups. Traditionally, such norms are justified by common beliefs that those who share similar role expectations, values, attitudes, and customs are less likely to find themselves in conflict. On the other hand, an outcome of endogamous marriages may be that partners' similar socioeconomic levels tend to keep wealth and power within a group

of the same class. Similarly, other unique benefits of such unions is that marrying within the same religious grouping may serve to retain the number of its members and, therefore, its political power and influence in the society as a whole.

34. According to the passage, a typical family unit in the U.S.

- (A) has a free selection of mates
- (B) shares a residence with other families
- (C) lives close to other family members
- (D) resides apart from its extended family

35. In line 4, the word "overlap" is closest in meaning to

- (A) coincide
- (B) consign
- (C) collide
- (D) concur

36. The author of the passage implies that American family relationships

- (A) have remained stable
- (B) have undergone changes
- (C) have few disparities
- (D) have little definition

37. What is the basis for the definition of a nuclear family in the U.S.?

- (A) Blood relationships or adoption
- (B) Two persons
- (C) Households
- (D) Marriage

38. In line 12, the word "kinship" is closest in meaning to

- (A) ownership
- (B) sponsorship
- (C) family connection
- (D) family services

39. The author of the passage implies that the law in the U.S. permits a person to have

- (A) one spouse in the course of a lifetime
- (B) several spouses in sequential order
- (C) a series of spouses at one time
- (D) two spouses during their lifetime

40. In line 17, the word "prescribe" is closest in meaning to

- (A) medicate

- (B) limit

41. According to the passage, what marriage partners are considered acceptable in most societies?

- (A) Those that have similar social characteristics.
- (B) Those that have a broad range of life experiences.
- (C) Those that have a good socioeconomic foundation.
- (D) Those that have similar attitudes to having children.

42. It can be inferred from the passage that endogamous marriages

- (A) help to diversify the society
- (B) help to preserve the existing social order
- (C) increase social mobility of individuals
- (D) decrease the number of conflicting signals.

Questions 43-50

For many people, mushrooms are strange, colorless, incomprehensible plants that should be avoided. Quaint tales and scary stories surround mushrooms because some are extremely poisonous. In reality, however, mushrooms are fungi that are simple plants without developed roots, leaves, stems, flowers, or seeds. They grow in wetlands, grassy meadows, and woods. Certain types of mushrooms are delicious and are included as ingredients in many recipes and trendy snacks. For example, morels are considered one of the choicest foods, and truffles, related to morels, are highly prized in Europe. Their shape is tubelike, and they remain entirely underground, a foot or more below the surface in the old days, dogs and pigs were specially trained to hunt them by scent.

Mushrooms stand out among other plants because they have no chlorophyll and cannot generate their own nourishment. The part of the fungus that rises above the ground is the fruiting body, and the vegetative part that produces growth is hidden under the ground. It can be usually dug up in the form of dense, white tangled filaments, which, depending on the food supply and moisture, can live for hundreds of years. In fact, mushrooms, as well as the rest of the fungus genus species, are one of the few remaining simple plants that are believed to be among the oldest living organisms. When their environment is not conducive to growth, filaments stop proliferating and can lie dormant for dozens of years.

Although mushrooms are rich in flavor and texture, they have little food value. Picking mushrooms requires a thorough knowledge of environments where they are most likely to grow and an ability to tell between edible and poisonous plants. Most mushrooms thrive in temperatures from 68 to 86 (F) with plenty of moisture, and nearly complete darkness produces the best crop. The entire mushroom should be picked, the stem, the cap, and whatever part that is underground. Brightly colored mushroom caps usually indicate that the plant is not fit for consumption, and the more the mushroom attracts attention, the more poisonous it is. Mushrooms with beautiful red or orange spotted caps that grow under large trees after a good rain are particularly poisonous. If milky or white juices seep from a break in the body of plant, chances are it should not be picked. Old mushrooms with brown caps are also not very safe.

43. In line 2, the word "quaint" is closest in meaning to
- (A) convoluted
 - (B) fanciful.
 - (C) irritating
 - (D) perfunctory
44. With which of the following statements is the author of the passage most likely to agree?
- (A) In the old days, when food was scarce, people chose mushrooms as food.
 - (B) Mushrooms should be treated as all other plants.
 - (C) Because they are poisonous, people should stay away from mushrooms.
 - (D) Mushrooms have different forms of roots, stems, and leaves.
45. In line 6, the word "trendy" is closest in meaning to
- (A) tender
 - (B) experimental
 - (C) fashionable
 - (D) trusted
46. In line 7, the word "Their" refers to
- (A) morels
 - (B) foods
 - (C) truffles
 - (D) morels and truffles
47. It can be inferred from the passage that mushrooms multiply mostly by means of
- (A) moisture
 - (B) fruiting bodies
 - (C) nourishment
 - (D) root systems
48. The author of the passage implies that mushrooms
- (A) have been known since ancient times
 - (B) are a relatively recent form of plants
 - (C) cannot survive without a good environment
 - (D) have been carefully analyzed
49. In line 20, the word "tell" is closest in meaning to
- (A) narrate
 - (B) distinguish
 - (C) say
 - (D) see

50. What does the author of the passage imply about brightly colored mushrooms?

- (A) They are beautiful.
- (B) They should not be eaten.
