

TOEFL Practice 08 - Tryout

Source of truth: DOCX only.

Listening Comprehension

Part A

DIRECTIONS: In Part A you will hear short conversations between two speakers. At the end of each conversation, a third speaker will ask a question about what the first two speakers said. Each conversation and each question will be spoken only one time. Therefore, you must listen carefully to understand what each speaker says. After you hear a conversation and the question, read the four choices and select the one that is the best answer to the question the speaker asked. Then, on your answer sheet, find the number of the question and blacken the space that corresponds to the letter for the answer you have chosen. Blacken the space completely so that the letter inside the space does not show.

Listen to the following example.

On the recording, you hear:

(Man) Does the car need to be filled?

(Woman) Mary stopped at the gas station on her way home.

(Narrator) What does the woman mean?

In your test book, you will read:

(A) Mary bought some food.

(B) Mary had car trouble.

(C) Mary went shopping.

(D) Mary bought some gas.

From the conversation you learn that Mary stopped at the gas station on her way home. The best answer to the question "Does the car need to be filled?" is (D), "Mary bought some gas." Therefore, the correct answer is (D).

Now let us begin Part A with question number 1.

1.

(A) The soup is delicious.

(B) The recipe is getting better.

(C) The soup does not taste very good.

(D) He decided to skip the soup.

2.

(A) They have their troubles, and we have ours.

(B) The man should write his own lab report.

(C) They never tell us the correct hours.

(D) The man needs to check the hours.

3.

(A) Andy keeps track of advising and registration.

- (B) It is important to listen to Andy with skepticism.
- (C) It is not necessary to add salt to the dish.
- (D) Andy has already finished his registration.

4.

- (A) The lettuce needs to be rinsed before it is used.
- (B) Let us wash up before we eat the sandwiches.
- (C) We like eating lettuce because it is healthy.
- (D) The lettuce is in the salad she is making.

5.

- (A) At the School of Business.
- (B) At a bookstore.
- (C) In a hardware shop.
- (D) In a grocery store.

6.

- (A) The sink has a bad odor.
- (B) It is too late to start looking at the puddle.
- (C) The man should not come at this hour.
- (D) The sink should be repaired.

7.

- (A) Mary is an author of a book.
- (B) Mary must have married a publisher.
- (C) The historian is getting married.
- (D) Historical novels are very popular.

8.

- (A) All customers get three pencils.
- (B) Those who take the test get a pencil.
- (C) All buyers receive a free gift.
- (D) Those who show their textbooks receive a free pencil.

9.

- (A) She has been looking for a cab for fifty minutes
- (B) She has been looking for a taxi for a pattern. quarter of an hour.
- (C) She has been lost for fifteen minutes while wearing a light coat.
- (D) She has sized up the situation correctly and called a cab

10.

- (A) People's recommendations are more effective than newspaper ads.
- (B) Most people do not pay attention to newspaper ads.
- (C) The new exhibit is promoted by the best advertising agency.
- (D) Words cannot describe the new exhibit effectively.

11.

- (A) The man needs to fill out the forms.
- (B) The man's car is out of gas and needs a fill-up.
- (C) The paint feels wet, and visitors should be careful.
- (D) The man is invited to go along.

12.

- (A) It is better to prepare before pouring it.
- (B) The batter contains four ingredients.
- (C) The mixture is poured on a hot surface.
- (D) The first pen is better than the next one.

13.

- (A) Julie and Michael plan to get married.
- (B) Julie and Michael decided to buy a new tie.
- (C) Julie's mother has not decided yet.
- (D) Julie's mother has no news to report.

14.

- (A) They cannot attend advising sessions.
- (B) An advisor is assigned to them.
- (C) They chose the wrong advising schedule.
- (D) An advisor shows them the correct schedule.

15.

- (A) It is a good idea to go jogging despite the hot weather.
- (B) It is important to stand up straight and exercise regularly.
- (C) The current weather is difficult to tolerate.
- (D) The weather has a long-standing pattern.

16.

- (A) They have little time for dancing these days.
- (B) They believe that gardening is serious business.
- (C) Their dancing classes have not started yet
- (D) Their gardening business is off to a good start.

17.

- (A) The color seems to be wrong.
- (B) She is not sure if she likes it.
- (C) She thinks that it is too short.
- (D) The man should not buy it.

18.

- (A) Renting a car
- (B) Going to the station
- (C) Planting a tree for children
- (D) Arriving late every day

19.

- (A) The search committee has filled out the applications.
- (B) The search for an office assistant has ended.
- (C) The hiring process has not been completed.
- (D) The applicants will still be reviewing the office

20.

- (A) Come back on Tuesday.
- (B) Take the test.
- (C) Take the course.
- (D) Make a choice of a major

21.

- (A) The dinner last week was a disaster.
- (B) She'll pay for the dinner.
- (C) She'll cook dinner this time.
- (D) She lives on Broadway.

22.

- (A) He finished the report already.
- (B) He wants to have another meeting.
- (C) He is tired' of meetings.
- (D) He doesn't have time on Sunday.

23.

- (A) Making an appointment
- (B) Going out on a date
- (C) Discussing Peter
- (D) Scheduling a departure

24.

- (A) He will rest in the afternoon.
- (B) He has to keep working.
- (C) He needs to clean his desk.
- (D) He has missed the deadline.

25.

- (A) Fred is mysterious.
- (B) Fred's class is not difficult.
- (C) She doesn't know.
- (D) She is taking a different class.

26.

- (A) Roberta had misplaced her key before.
- (B) Roberta's husband is late again.
- (C) Roberta's husband does not treat her very well.
- (D) Roberta had returned from work.

27.

- (A) At a gift shop
- (B) In a bank
- (C) At a florist's
- (D) In a delivery office

28.

- (A) It takes an hour to get to the NorthCampus from here.
- (B) The shuttle comes twice an hour.
- (C) It'll be 15 minutes for the shuttle to get here.
- (D) The shuttle is 15 minutes behind the schedule.

29.

- (A) The man can't park there.
- (B) It's okay to leave the car only for a few minutes.
- (C) She doesn't live on this block.
- (D) The man should park in the driveway.

30.

- (A) The woman is more careful now than she used to be.
- (B) The woman is not very careful.
- (C) He will help the woman with the gate.
- (D) He wishes only the best for the woman.

Part B

DIRECTIONS: In this part of the test, you will hear longer conversations. After each conversation, you will hear several questions. The conversations and questions will not be repeated. After you hear a question, read the four possible answers in your test book and select the best answer. Then, on your answer sheet, find the number of the question and fill in the space that corresponds to the letter of the answer you have chosen. Remember, you are not allowed to take notes or write in your test book.

Listen to the following example:

You will hear:

You will read:

(A) He has changed jobs.

(B) He has two children.

(C) He has two jobs.

(D) He is looking for a job.

From the conversation you learn that Tom has taken an additional job. The best answer to the question "Why is Tom tired?" is (C), "He has two jobs." Therefore the correct answer is (C).

31.

- (A) Select trees that he can plant in his yard.
- (B) Suggest trees that do not require much care.
- (C) Figure out the best variety of trees.
- (D) Point out trees that are on sale.

32.

- (A) Fruit growth, shade, and appearance
- (B) Soil erosion, height, and slope orientation
- (C) Southern exposure, roots, and water
- (D) Soil density, light, and heat tolerance

33.

- (A) They do not do well in direct sunlight.
- (B) Their root systems need good drainage.
- (C) They improve the environment and shade.
- (D) Their height can become a problem.

34.

- (A) Buy a few short trees.
- (B) Prune more trees.
- (C) Learn more about trees.
- (D) Think a little longer.

35.

- (A) Talk to the violin maker.
- (B) Play the instrument.
- (C) Wait for the wood to dry.
- (D) Adjust the bow strings.

36.

- (A) .It is a lengthy process.
- (B) It is a delightful hobby.
- (C) It is a musical endeavor.
- (D) It requires musical expertise.

37.

- (A) Music
- (B) Violin
- (C) Writing
- (D) Reading

38.

- (A) Glasses are less inconvenient.
- (B) Contacts can be more easily lost.
- (C) Contacts are more difficult to keep clean.
- (D) Glasses are less preferable.

39.

- (A) One
- (B) Two
- (C) Three
- (D) Four

40.

- (A) Researching lens plastics
- (B) Scheduling an eye exam
- (C) Locating an optometrist
- (D) Saving enough money

Part C

DIRECTIONS: In Part C you will hear short lectures and extended conversations. At the end of each, you will be asked several questions. Each lecture or conversation and each question will be spoken only one time. For this reason, you must listen carefully to understand what each speaker says. After you hear a question, read the four choices and select the one that best answers the question the speaker asked. Then, on your answer sheet, find the number of the

question and blacken the space that contains the letter for the answer you have chosen. Answer all questions according to what is stated or implied in the lecture or conversation.

Listen to this sample talk.

You will hear:

Now listen, to the following example.

You will hear:

You will read:

(A) By cars and carriages

(B) By bicycles, trains, and carriages

(C) On foot and by boat

(D) On board ships and trains

The best answer to the question "According to the speaker, how did people travel before the invention of the automobile?" is (B), "By bicycles, trains, and carriages." Therefore, the correct answer is (B). You are not allowed to make notes during the test.

41.

- (A) To assist international travelers with data and changes
- (B) To elaborate on the system calendars in various locations
- (C) To explain the conventions of marking and changing dates
- (D) To demonstrate the connections between meridians and air travel

42.

- (A) Travelers have to choose the best days and times for their cross-continental journeys.
- (B) The distance from Los Angeles to Asia is similar to that from New York to London.
- (C) Date changes occur some time when air travelers cross the Pacific.
- (D) A loss of several hours of sleep is possible during long cross-continental flights.

43.

- (A) They should count the number of hours or add hours to the local time.
- (B) They need to add or subtract a day when crossing the date line.
- (C) They should buy a Western or Eastern calendar to match the local day count.
- (D) They need to count the beginnings of days from midnight to midnight.

44.

- (A) North-to-south standard time zones
- (B) Loose elliptical connections among longitudes
- (C) The line near the 24th hour on the local calendar
- (D) The area along the 180th meridian of longitude

45.

- (A) To describe the people who live on the island
- (B) To point out earth divisions similar to those in Alaska
- (C) To explain the rigidity of meridian lines

(D) To illustrate the swerves in the date line

46.

- (A) The prehistoric northern settlements carbohydrates and the Northwestern Passage
- (B) The historical and economic significance of northern explorations
- (C) The Greek, English, and Spanish explorers of the northern seas
- (D) The connections between the English-Spanish war and northern explorers

47.

- (A) Together with the English, they defeated the Spanish fleet.
- (B) Unlike the Dutch, they looked for the Northern Passage.
- (C) Together with the Spanish, they controlled the southern seas.
- (D) Unlike other merchants, they did not trade in India.

48.

- (A) Those that are low in calories
- (B) Those that are high in protein
- (C) Those that are eaten on a usual basis
- (D) Those that are eaten at regular intervals

49.

- (A) Vitamins and minerals
- (B) Corn and potatoes
- (C) Bread and butter
- (D) Fish and beans

50.

- (A) Various kinds of fats
- (B) Different types of sugars
- (C) Half of all calories consumed by Americans
- (D) Half of all nutrients found in carbohydrates

Structure and Written Expression

Sentence Completion

This section is designed to test your ability to recognize language structures that are appropriate in standard written English. The questions in this section belong to two types, each of which has special directions.

DIRECTIONS: Questions 1-15 are partial sentences. Below each sentence you will see four words or phrases, marked (A), (B), (C), and (D). Select the one word or phrase that best completes the sentence. Then, on your answer sheet, find the number of the question and fill in the

space that contains the letter for the answer you have chosen. Fill in the space completely.

EXAMPLE I

Drying flowers is the best way.....them.

- (A) to preserve
- (B) by preserving
- (C) preserve
- (D) preserved

The sentence should state, "Drying flowers is the best way to preserve them." Therefore, the correct answer is (A).

EXAMPLE II

Many American universities.....as small, private colleges.

- (A) begun
- (B) beginning
- (C) began
- (D) for the beginning

The sentence should state, "Many American universities began as small, private colleges." Therefore, the correct answer is (C). After you read the directions, begin work on the questions.

1. The Internet.... access to current news, political articles, business statistics, and software for practically any purpose.

- (A) can provide ready
- (B) can be provided readily
- (C) ready and can be providing
- (D) is ready and can provide

2. Descriptive analysis of language merely reflects.... used without concern for the social prestige of these structures.

- (A) it how grammar structures and vocabulary is
- (B) how are grammar structures and vocabulary
- (C) how grammar structures and vocabulary are
- (D) it is how grammar structures and vocabulary are

3. James Boswell was a Scottish author whose private journals..... personality and colorful experiences during his European journeys, meetings with renowned French philosophers, and adventures with Corsican rebels.

- (A) revelations of his fascinating
- (B) revealing his fascination
- (C) his revealing fascinations
- (D) reveal his fascinating

4. Originally, the first European colleges consisted of groups of individuals..... joined their efforts to study sciences, medicine, and law.

- (A) who lived together and
- (B) whose life together and
- (C) and who live together
- (D) whose living together and

5. Sedimentary rock represents. geologically transformed minerals and small particles of – — — deposited by the movement of water, wind, or glacial ice.

- (A) chemicals matter
- (B) chemical matter
- (C) matters of chemical
- (D) matters in chemicals

6. The buff pottery with red designs made by the Hohokam desert dwellers in the Southwestern regions..... for its original construction and unique shape.

- (A) are highly prized
- (B) is a high price
- (C) is highly prized
- (D) are prized highly

7. Soap operas and day-time comedy serials were..... originated in Chicago in the 1930s, and most consisted of 15- minute episodes broadcast five times a week.

- (A) radio shows that
- (B) that radio showing
- (C) shown that radio
- (D) radio that is shown

8. Although food preferences vary a great deal from one individual to another, geographic location, traditional customs, and family socioeconomic position play a major role....

- (A) formational in dieta
- (B) informing dietary habits
- (C) in forming dietary habits
- (D) in forming dietary habitual

9. Precipitation of microscopic marine organisms on the ocean floor results in the creation of limestone, parallel or discordant layers of deposited.....chemical material.

- (A) characteristics in
- (B) of the characteristic
- (C) characterized by
- (D) in the characterization of

10. Approximately 400 million to 250 million years ago, the ability of primitive plants to reproduce by seed.....to cope with harsher habitats than could the flora that reproduced by spores.

- (A) has allowed for them
- (B) was allowed by them
- (C) have been allowed them
- (D) allowed them

11. Some language experts might say.....to a person speaking a language one does not understand and still determine whether the speaker is excited or exhausted, angry, or pleased.

- (A) that possibly it is to listen
- (B) what is possible to listen to it
- (C) that it is possible to listen
- (D) whether is it a possibility to listen

12. David Smith, who welded metal sculptures and relied on his experience as a welder in a factory during World War II, opened new paths for..... to experiment with landscape art composed of objects.

- (A) other artists
- (B) another, artists
- (C) others artists
- (D) the others, artist

13. Exercise can be classified as active or passive with the former.....effort and the latter the use of machines or training assistants.

- (A) involves physical
- (B) physics is involved
- (C) involving physical
- (D) physically involved

14. The construction of the Alaska Highway..... in 1939 and led to a economic boom and population growth in Northern Territories.

- (A) was beginning
- (B) it began
- (C) has been begun
- (D) was begun

15. the perishable quality of organic fibers, it is not possible to trace early techniques associated with weaving and interlacing of twines and threads.

- (A) Because
- (B) Due to the fact that
- (C) Because of
- (D) Due to the fact

Error Identification

DIRECTIONS: In questions 16-40 every sentence has four words or phrases that are underlined. The four underlined portions of each sentence are marked (A), (B), (C), and (D). Identify the one word or phrase that makes the sentence incorrect. Then, on your answer sheet, find the number of the question and fill in the space that contains the letter for the answer you have chosen. Fill in the space completely.

EXAMPLE I

Christopher Columbus has sailed(A) from Europe in 1492 and discovered a(B) new land(C) he thought to(D) be India.

The sentence should state, "Christopher Columbus sailed from Europe in 1492 and discovered a new land he thought to be India." Therefore, you should choose answer (A).

EXAMPLE II

As the roles(A) of people in society change, so does(B) the rules of(C) conduct in certain situations(D).

The sentence should state, "As the roles of people in society change, so do the rules of conduct in certain situations." Therefore, you should choose answer (B).

16. Because of(A)the federal government did not relocate from(B)Philadelphia to Washington, D.C., until 1800, George Washington and his wife never moved into(C)the White House but resided in Philadelphia(D)instead.

17. Parallels, which are imaginary dividing lines(A)drawing parallel(B)to the equator and perpendicular to the Earth's axis, measure distances north(C)and south by sectioning the globe into equally spaced circles(D).

18. In his novel published(A)in 1894, Mark Twain referred to fingerprinting as a completely reliable(B)technique for established(C)a personal identity of twins differentiated by the shape of ridges(D)on their fingertips.

19. Ancient Greek philosophers believed(A)that listening to musicals arrangements(B)and particular types of sounds(C)led young children to develop beneficial physical and mental(D)characteristics.

20. At the end of the American Civil War, Andrew Jackson succeeded(A)Abraham Lincoln as the U.S. president(B)and after completing(C)his term returning(D)to his home state of Tennessee.

21. Before the American Revolution, the task of maintaining law and order(A)was carrying out(B)by elected officials(C)and citizens to keep a careful watch for fires and suspicious activities in towns and rural areas alike(D).

22. Edmund Malone was a great scholar whom depicted(A)the life and work of William Shakespeare and contributed his expertise(B)in language to publishing a formal(C)biography of the playwright and his humble beginnings(D).

23. Water levels in the Great Lakes fluctuate dramatically(A)over periods of years by as much as one(B)meter, and during the spring runoff, the levels may rise(C)or fall by as much as two meters, particularly in Lake Erie, the shallow of the five(D).

24. Whether sounds are perceived(A)to be musical or not depends on learning more(B)and cultural conditioning than(C)the physical properties of sounds or innate characteristics(D)of the human brain.
25. Baobab trees that closely related(A)to the family of bottle and cactus trees have thick trunks with soft centers that store water(B)in sufficient amounts(C)to enable the plants to weather long(D)periods of desert droughts.
26. Since the early twentieth century(A), the mass-production of automobiles has begun to change(B)the American lifestyle and landscape, as ready access by(C)a motor vehicle determines where do people(D)build houses and other facilities.
27. Although radiocarbon dating of archeological finds(A)can prove to be fair reliable(B)for establishing the age of prehistoric objects, additional techniques must be employed(C)to date objects older than(D)50,000 years.
28. Owing(A)to their superior skill(B), highly competitive athletes have been known(C)to win contests and break records even when suffered(D)from injuries, physical disorders, and infections.
29. The keyboard was invented(A)in medieval Europe during the rise of(B)multipart musical compositions and replacement(C)the mechanical dulcimer in domestic uses(D)and public performances.
30. The Paleo-Indian tribes were able to switch(A)from food gathering and nomadic way of life to permanent settlements only they(B)acquired means of planting(C)and harvesting more predictable(D)crops of grain and beans.
31. Hand axes founded(A)in the high banks of the Thames River have been identified(B)as much older artifacts than pottery shards excavated in(C)the lower flood planes located in different(D)geological strata.
32. In stained-glass work(A), cut pieces of colored glass are positioned(B)in incremental frames made of shape metal strips(C)and soldered to a large overall(D)frame.
33. The colonies of settlers who were called(A)the "Pennsylvania Dutch" actually consisted from(B)German, Swiss, and Moravian members of religious sects who secluded(C)themselves from(D)political and social affairs of their secular neighbors.
34. The price theory that represents(A)the core of microeconomics explained(B)how the variability of supply and demand in competitive(C)markets creates(D)an interplay of prices for goods and services.
35. Historians believe that Navajo tribes migrated to(A)the south from the northwestern coasts of(B)Alaska and Canada and populated the(C)Southwestern states as recent as(D)500 years ago.
36. During his remarkable career, Paul Samuelson served as(A)a magazine columnist, consultant to(B)research organizations, advised two(C)presidents, and lecturer on mathematical analysis on levels of(D)employment.

37. In 1838, Auguste Comte devised the term "sociology" to refer(A) to a new science that will discover(B) regularities of human society similar to(C) laws of nature by employing(D) investigative methods.
38. Although zebras are related to horses(A), they are size(B) is closer to that of donkeys whom they(C) resemble in behavior and body form, with short legs(D), high shoulders, a stiff black mane, large ears, and a tufted tail.
39. Influenced(A) by the advancements in behavioral sciences, George Mead argued(B) that communication and interaction with the environment(C) are the keys to understand(D) an organism's self-consciousness.
40. Among the sixteenth-century Dutch painters, Peter Bruegel is the most(A) notable because of his(B) portrayal of peasant scenes and proverbial folktales that have charmed(C) art aficionados since more(D) than 400 years.

Reading Comprehension

Time 55 minutes

DIRECTIONS: In this section you will read several passages. Each passage is followed by a series of questions. For questions 1-50, you need to select the best answer, (A), (B), (C), or (D), to each question. Then, on your answer sheet, find the number of the question and fill in the space that contains the letter of the answer you have selected. Fill in the space completely. Answer all questions following a passage on the basis of what is stated or implied in the passage.

Read the following passage:

A tomahawk is a small ax used as a tool and a weapon by the North American Indian tribes. An average tomahawk was not very long and did not weigh a great deal. Originally, the head of the tomahawk was made of a shaped stone or an animal bone and was mounted on a wooden handle. After the arrival of the European settlers, the Indians began to use tomahawks with iron heads. Indian males and females of all ages used tomahawks to chop and cut wood, pound stakes into the ground to put up wigwams, and do many other chores. Indian warriors relied on tomahawks as weapons and even threw them at their enemies. Some types of tomahawks were used in religious ceremonies. Contemporary American idioms reflect this aspect of American heritage.

EXAMPLE I

Early tomahawk heads were made of

- (A) stone or bone
- (B) wood or sticks
- (C) European iron
- (D) religious weapons

According to the passage, early tomahawk heads were made of stone or bone. Therefore, the correct answer is (A).

EXAMPLE II

How has the Indian use of tomahawks affected American daily life today?

- (A) Tomahawks are still used as weapons.
- (B) Tomahawks are used as tools for certain jobs.
- (C) Contemporary language refers to tomahawks.
- (D) Indian tribes cherish tomahawks as heirlooms.

The passage states, "Contemporary American idioms reflect this aspect of American heritage." The correct answer is (C). After you read the directions, begin work on the questions.

Questions 1-12

Architecture has social purposes and meets practical needs by means of combining art and technological innovations. In building construction, however, an emergence of new materials does not make its precursors obsolete, and architectural knowledge is cumulative. The fact that today much is constructed from prefabricated concrete does not do away with brick. Furthermore, despite dramatic changes and increased technological sophistication of architectural design and construction, the essential apparatus of erecting a building has remained rooted in preindustrial traditional practices passed down during the millennia. The social and utilitarian expectations of structures are largely based on elemental demands of keeping out elements and enemies, ameliorating the extremes of heat, and avoiding the intrusion of wind, precipitation, and pests.

Gravity, air pressure, and earthquakes can induce tensions that have to be accounted for when constructing functional enclosed space. Vertical stacking of masonry materials causes compression that can lead to important problems when a structure is spanned to build a roof and connect walls. Arches, vaults, and domes were specifically developed to alleviate the compression by directing the spanning element along a curve rather than a straight line. Building suspension structures, dams, and tunnels became possible in the nineteenth century with the increased availability of steel that could reinforce structural frames and enable them to withstand natural forces previously believed to be insurmountable. Functional evolutions of modern buildings create new demands on the analysis of structural behavior and engineering. Few occupants of skyscrapers view elevators as elaborate systems of vertical transportation. Humidity and temperature control, forced ventilation, natural and artificial lighting, sanitation and disposal of waste, electrical wiring, and fire prevention make very tall constructions engineering marvels that also must be aesthetically pleasing and physically convenient.

Erecting a structure involves a great deal more than merely attending to the aesthetics and psychological experience of architectural space. The shape, size, and incombustibility of locally available construction materials fostered developments of specific technologies, and brick and stone masonry have evolved in response to the need for structural durability. Advances in civil engineering and knowledge associated with properties of building materials combine to lead to innovations in architectural design. Tools and skills required to exploit easily obtainable materials have continued to inform the development of modern industrialized technologies.

1. What is the main topic of the passage?

- (A) The modern art of architecture and social pressure
- (B) The profound importance of tradition in architecture
- (C) The mutual impact of architecture and technology
- (D) The great technological advances in building materials

2. The word "obsolete" in line 3 is closest in meaning to

- (A) obvious
 - (B) obstinate
 - (C) antiquarian
 - (D) antiquated
3. The author mentions the word "brick" in line 5 as an example of which of the following?
- (A) How old techniques can continue to remain practical
 - (B) How old buildings can coexist with modern architecture
 - (C) How new knowledge can supplant traditional technology
 - (D) How new design can improve traditional construction
4. It can be inferred from the passage that pragmatic requirements of buildings
- (A) retain essential sophistication
 - (B) hold constant over time
 - (C) stagnate over millennia
 - (D) stay rooted in the elements
5. What can be inferred from the passage about reducing the effects of material compacting?
- (A) Masonry is stacked vertically by increasing compression.
 - (B) Downward pressure is dispersed by semicircular roofs.
 - (C) Buildings are spanned to account for the force of gravity.
 - (D) Vertical roofs are bent to counteract air pressure.
6. The word "withstand" in line 18 is closest in meaning to
- (A) endure
 - (B) enlarge
 - (C) withdraw
 - (D) withhold
7. The purpose of paragraph 3 is to suggest that
- (A) tall buildings require large amounts of wiring to make them functional
 - (B) architectural innovations pose new challenges for technological development
 - (C) skyscrapers need to be appealing and convenient for their occupants
 - (D) architects of modern buildings create a demand for engineering talent
8. The word "marvels" in line 23 is closest in meaning to
- (A) miracle
 - (B) mirage
 - (C) conception
 - (D) construction
9. According to the passage, what is one of the important requirements of building materials?

- (A) They need to be large and well shaped.
- (B) They should be locally produced.
- (C) They do not affect human psychology.
- (D) They have to be inflammable.

10. The word "fostered" in line 27 is closest in meaning to

- (A) founded
- (B) focused
- (C) encouraged
- (D) enveloped

11. It can be inferred from the passage that architecture and engineering

- (A) are at the opposite ends of the technological spectrum
- (B) go hand in hand to promote art and science
- (C) compete for technological advancements
- (D) supercede aesthetic and experiential values

12. The word "inform" in line 31 is closest in meaning to

- (A) insist on
- (B) infringe on
- (C) contrast with
- (D) contribute to

Questions 13-21

In the winter of 1848, James Marshall, a carpenter from New Jersey, was contracted by John Sutter to build a sawmill in Coloma in eastern California. On January 24, Marshall discovered gold on the mill grounds. He took his find to Sutter, who attempted to keep the news a secret and made his hired hands promise not to divulge it. However, Samuel Brannan, a shrewd San Francisco businessman, who owned a general store in the vicinity of Sutter's mill, saw potential for profit. In the spring, after hearing the rumors from the storekeeper in Coloma, Brannan hastily traveled to the Sacramento Valley and on his return widely disseminated the news about the untold riches in the diggings.

The first new arrivals assumed that the story of the gold was a hoax, and many were idle curiosity seekers. However, within weeks, scores of city dwellers began to move by ships and boats to reach the Coloma fort, and in subsequent months, rumors spread further down the coast of California, across the Mexican border, and to Hawaii. In eastern states, the press published reports of miners who struck it rich overnight so vast were the California gold deposits. Between 1848 and 1851, in all, around half a million fortune-seekers from around the globe descended on California to pursue instant wealth and thus took part in one of the largest migrations in history.

The accounts of the Sutter Mill deposits were not entirely untruthful. In December of 1848, President James Polk confirmed the news about the California gold in a statement to Congress, and the message was picked up by press agencies worldwide. Not all Forty-Niners, as the prospectors came to be known, made their journey in vain. The swath of gold-bearing quartz ran 100 miles wide along the Sierra Nevada mountain range and

stretched from La Porte to Mariposa. During the initial stages of the Gold Fever, yields of \$300 to \$400 a day were not infrequent, and by the end of 1849, nearly \$10 million worth of deposits had been excavated. However, as competition for land claims increased, yields and profits began to drop off, and ore nuggets and dust began to disappear from dry streambeds and ravines. As mining operations became more laborious, individual prospectors were replaced by large commercial ventures, when groups of miners employed their penniless counterparts to divert and dry up rivers with strategically positioned dams and canals. The gold rush of 1849 was followed by the next wave of migrants headed to the Klondike region in Yukon Territory in mid-1897 to recover the gold at the conflation of two rivers

13. The word "contracted" in line 1 is closest in meaning to

- (A) empowered
- (B) employed
- (C) emboldened
- (D) embodied

14. According to the passage, who was initially instrumental in diffusing accounts of Coloma gold?

- (A) A carpenter
- (B) A mill owner
- (C) A merchant
- (D) A business operator

15. In line 5, the word "vicinity" is closest in meaning to

- (A) proximity
- (B) propensity
- (C) propriety
- (D) profundity

16. The purpose of paragraph 2 is to demonstrate

- (A) the suspicions of curiosity seekers
- (B) the significance of population resettlement
- (C) the influence of published press reports
- (D) the wealth of gold deposits

17. The word "scores" in line 10 is closest in meaning to

- (A) a greater good
- (B) a great stock
- (C) a great many
- (D) a greater evil

18. It can be inferred from the passage that California gold had a variety of

- (A) polemical and ecological outcomes
- (B) proclamations and denunciations in the White House
- (C) proponents and opponents in Congress
- (D) political and economic ramifications

19. In line 20, the word "prospectors" is closest in meaning to

- (A) entrepreneurs
- (B) enthusiasts
- (C) miners
- (D) minions

20. It can be inferred from the passage that many Forty Niners

- (A) acquired great wealth
- (B) infected many laborers
- (C) attained great dispositions
- (D) inflated many recounts

21. The author of the passage implies that the California Gold Fever

- (A) was a unique event in North American history
- (B) was a singular event in the succession of others
- (C) presented a lone occurrence on the North American continent
- (D) preserved a unique page in North American development

Questions 22-31

During the late Middle Ages, oil paint took hold as the artistic medium of choice because it was effective, flexible, and resilient relative to the wax-based, watercolor, fresco, or tempera paints prevalent at the time. Although contemporary commercially prepared paints contain a mixture of pigments and linseed oil, poppy oil paints are also available to connoisseurs. The original recipes developed in medieval European monasteries relied on fast-drying bases derived from various organic oils predominantly valued for their medicinal qualities. The pigments are insoluble, lightproof, and chemically inert powders ground in the base. Occasionally, varnish can be added to increase the paste's ability to reflect light and to cover pictures with a protective seal. The resulting stiff, resinous compounds are often packaged in flexible metal or plastic tubes. Historically, yellow pigments have been added to the oil, and then the paste was layered over tin foil to imitate the appearance of gold leaf.

Despite the numerous experiments to accelerate the drying process, oil paints dry comparatively slowly, with little color alteration. An important advantage of color stability is that tones and undertones are easy to blend, match, transpose, and grade, and mistakes and smudges are simple to correct. Due to the creamy consistency of most mixtures, artists can exploit their viscosity in thick applications, sprays, thin trickles, and three-dimensional blobs. The purification by boiling and filtering and bleaching of oils can impart varied hues to powdered pigments, while drying time can be reduced by adding metallic oxides. Professional painters who mix their own medium usually have their own trademark methods of mixing materials that art experts recognize as a part of an artist's creative work.

The thickness of the paste also plays an important role in defining the stages of painting a picture. After the basic design is sketched in pencil or charcoal, the broad background or foreground areas of the canvas are covered with thin, diluted paint on top of the primer. A thicker paint, often with added varnish, is subsequently used to refine and outline the foundation. The width of the brush depends on the type of paint the artist chooses to use, and stiff bristles are usually found in narrow brushes for making sharp lines, while softer brushes of animal hair can be employed in broad strokes.

22. What does the passage mainly discuss?

- (A) The evolution and history of oil paintings and media
- (B) The technology and development of drying oils
- (C) The recipes and ingredients for producing oil paints
- (D) The composition and techniques for mixing oil paints

23. It can be inferred from the passage that oil paintings

- (A) supplanted the use of tempera and fresco
- (B) took hold of the artistic choices in the Middle Ages
- (C) promoted artistic talent since the early times
- (D) supported the usefulness of applying paints

24. In lines 4 and 5, the word "connoisseurs" is closest in meaning to

- (A) explorers
- (B) experts
- (C) exporters
- (D) experimenters

25. According to the passage, medieval monks extracted oil

- (A) from minerals
- (B) in conjunction with pigments
- (C) from plants
- (D) in combination with medicines

26. In line 8, the phrase "the base" is closest in meaning to

- (A) paint
- (B) oil
- (C) chemicals.
- (D) pestle

27. The purpose of paragraph 2 is to illustrate

- (A) the laboriousness of making oil paints
- (B) the durability of oil colors
- (C) the complexity of oil purification
- (D) the superiority of oil paints

28. In line 17, the word "viscosity" is closest in meaning to
- (A) stiffness
 - (B) elasticity
 - (C) stickiness
 - (D) eloquence
29. Which of the following is NOT mentioned as components of oil paints?
- (A) accelerants
 - (B) retarders
 - (C) sealants
 - (D) glosses
30. In line 20, the word "trademark" is closest in meaning to
- (A) signature
 - (B) selection
 - (C) significance
 - (D) secret
31. The author of the passage implies that an oil painting
- (A) requires professional painters to mix their own paint
 - (B) contains a layer of canvas and charcoal
 - (C) thickens as the oil continues to dry in stages
 - (D) requires multiple layers of brushwork

Questions 32-41

Samuel Johnson's achievements in lexicography and writing have few rivals in English eighteenth-century literature. Johnson was born on September 18, 1709, in the family of a bookseller and stationer, and his education began informally among his father's books, as Samuel was above all an insatiable reader. During his years at Pembroke College, Oxford, he acquired a reputation for prodigious learning and eccentricities that were as diverse as his reading. After being plagued by many ailments and emotional breakdowns, he was compelled to leave the college in poverty, and later in life, his despondency led him to a profound devotion to religion.

Following his father's death in 1731, Johnson tried his hand in teaching and attempted to run a school, but his early ventures met with rapid demise. When Johnson was twenty-six, he married Elizabeth Porter, a widow with a little fortune, who was twenty years his senior and who became the source of calm, support, and self-confidence in his life. In 1737 in London, Johnson began a life-long period of writing and lexicographic work that made him a figure of renown.

To his contemporaries, Johnson was known as a man of large and unwieldy constitution and unpleasant manner. He recklessly dominated conversations, monopolized discussion topics, and boorishly overwhelmed opposing points of view. His antagonistic habits cost him many a friend. In 1747, burdened with extreme poverty, Johnson was commissioned to compile a dictionary by a consortium of booksellers who sought to raise their volume of

sales. After eight years of obsessive and consuming labor, this monumental work with 40,000 entries with lucid, witty, occasionally spiteful, and idiosyncratic definitions, titled *Dictionary of the English Language*, saw the light of day in 1755. The remarkable, still-quoted lexicographic work with an enormous range of elucidating descriptions and illustrative exemplars became the imitable forerunner of how English language dictionaries are constructed to this day.

During the nineteenth century, literary critics largely saw Johnson's literary contributions as slight with regard to their scholarly influence. It was perhaps Johnson's personal attributes that influenced the perspective through which he was portrayed. While his prose was viewed as dignified, vivid, and urbane, his vast body of work in poetry, novels, essays, tragedies, travelogues, biographies, diaries, and satire remained obscure until Joseph Krutch, an American critic, published a penetrating study *Samuel Johnson* in 1944. In 1978, Walter Bate won a Pulitzer Prize for his comprehensive psychological biography of Johnson that established him as rational, compassionate, and undaunted advocate of moral order and unceasing quest for truth.

32. What does the passage mainly discuss?

- (A) The life, ailments, and dictionary of Samuel Johnson
- (B) Samuel Johnson's controversial character and work
- (C) Samuel Johnson's contradictory traits and publications
- (D) The family, commissions, and biographies of Samuel Johnson

33. In line 5, the word *prodigious* is closest in meaning to

- (A) immoral
- (B) imminent
- (C) immense
- (D) immediate

34. In line 6, the word "plagued" is closest in meaning to

- (A) diseased
- (B) disfigured
- (C) trampled
- (D) tormented

35. In line 4, the word "overlap" is closest in meaning to

- (A) coincide
- (B) consign
- (C) collide
- (D) concur

36. According to the passage, Johnson's marriage

- (A) was a miserable failure due to poverty
- (B) was motivated by convenience and money
- (C) provided him a safe haven

(D) afforded him new writing venues

37. The word "antagonistic" in line 17 is closest in meaning to.

- (A) hallow
- (B) heated
- (C) hospitable
- (D) hostile

38. According to the passage, the Dictionary descriptions of word meanings

- (A) are emulated by modern lexicographers
- (B) were not without peculiarities
- (C) are considered exemplary by linguists
- (D) were not consistently illustrated

39. The word "obscure" in line 30 is closest in meaning to

- (A) offensive
- (B) obtuse
- (C) irrelevant
- (D) irreverent

40. Which of the following is NOT mentioned among the genres of Johnson's writing?

- (A) Plays
- (B) Biographies
- (C) Quotations
- (D) Articles

41. The word "slight" in line 27 is closest in meaning to

- (A) trivial
- (B) triumphant
- (C) sinister
- (D) solemn

Questions 42-50

Psychologists who work on motivation research a wide range of human traits and physiological characteristics that include the effects of hunger, reward, and punishment, as well as desires for power, tangible achievement, social acceptance, belongingness, self-esteem, and self-actualization. A plethora of hypotheses developed in the nineteenth and twentieth centuries have the goal of identifying causes of an organism's behavior that can be both conscious and unconscious. The hierarchical organization of human needs is a theoretical model, originally established by an American psychologist, Abraham Maslow, in 1954. The needs located at the bottom of the pyramid are the essentials of physiological survival that encompass oxygen, water, nutrition, rest, and avoidance of pain. Maslow's theory, grounded in research, also stipulated that these are variable and, at least to some extent, may explain,

for example, food gratification. The second tier is rooted in the human need for safety, stability, and protection.

In the human life cycle, the needs for belonging are manifested in the desires to marry, have a family, belong in a community or among similarly minded people. In part, the need to belong can also show up in a search for particular types of occupations or careers. The next level of the hierarchy in effect deals with two substrata, where the first presumes the need for status, prestige, recognition, appreciation, and dominance, and the higher division includes a conglomeration of emotionally centered traits that pivot on competence, confidence, mastery, achievement, independence, and freedom.

The top tier is different from all others, and Maslow referred to it as growth motivation and self-actualization. At the highest level, individuals seek to realize and put to use their creativity, talent, leadership, curiosity, and understanding. At this level people can reach their full potentials and accurately perceive and accept reality, seek privacy and depth in personal relationships, resist enculturation, and develop social interests, compassion, and humanity. In many cases, self-actualizers do not lead ordinary lives, choose growth over safety, and cultivate peak experiences that leave their mark and change one for the better.

42. According to the passage, what does psychology of motivation attempt to uncover?

- (A) Reactions to hunger and desires for power
- (B) Developments of human physiology and mind
- (C) Reasons for human conduct and moving forces
- (D) Organization of human society and hierarchies

43. The word "plethora" in line 4 is closest in meaning to

- (A) oversimplification
- (B) overlap
- (C) overreach
- (D) overabundance

44. It can be inferred from the passage that in Maslow's hierarchy

- (A) the first layer of needs dominates other tiers
- (B) the highest level of the model supercedes the lower levels
- (C) the second layer of needs is more urgent than the first
- (D) the third level of the model is embedded in the fourth

45. In line 6, the word "trendy" is closest in meaning to

- (A) tender
- (B) experimental
- (C) fashionable
- (D) trusted

46. The word "gratification" in line 11 is closest in meaning to

- (A) gratitude
- (B) pleasure

- (C) gratuity
- (D) pleasantry

47. It can be inferred from the passage that in modern-day terms, the second layer of needs can be reflected in people's desire for

- (A) a house in an upscale neighborhood
- (B) a protected existence and dependence
- (C) a measure of job and financial security
- (D) a degree of friendship and family life

48. The word "conglomeration" in line 18 is closest in meaning to

- (A) complex
- (B) congress
- (C) conjunction
- (D) connotation

49. Which of the following is NOT mentioned as a factor in human motivation?

- (A) Esteem
- (B) Participation
- (C) Accomplishment
- (D) Conformism

50. Which of the following conclusions is supported by the passage?

- (A) Genuine self-actualizers may attain self-satisfaction.
- (B) Sincere self-promoters can achieve full contentment.
- (C) Real self-starters can achieve their lives' desires.
- (D) True self-actualizers may lead complicated lives.
