Listening Comprehension

Part A

DIRECTIONS: In Part A you will hear short conversations between two speakers. At the end of each conversation, a third speaker will ask a question about what the first two speakers said. Each conversation and each question will be spoken only one time. Therefore, you must listen carefully to understand what each speaker says. After you hear a conversation and the question, read the four choices and select the one that is the best answer to the question the speaker asked. Then, on your answer sheet, find the number of the question and blacken the space that corresponds to the letter for the answer you have chosen. Blacken the space completely so that the letter inside the space does not show.

Listen to the following example.

On the recording, you hear:

(Man) Does the car need to be filled?

(Woman) Mary stopped at the gas station on her way home.

(Narrator) What does the woman mean?

In your test book, you will read:

(A) Mary bought some food.

(B) Mary had car trouble.

(C) Mary went shopping.

(D) Mary bought some gas.

From the conversation you learn that Mary stopped at the gas station on her way home. The best answer to the question "Does the car need to be filled?" is (D), "Mary bought some gas." Therefore, the correct answer is (D).

Now let us begin Part A with question number 1.

Woman: The animated short starts right after the previews.

Man: Cartoons again? I came to see the feature film, not a cartoon.

Woman: It is part of the program. Besides, modern animation is more complicated than you think.

Woman: Why don't you want to watch the animated short?

Man: I'm not a child anymore. I'd rather wait for the feature.

Woman: You may be surprised. Animated films are not only for children.

Woman: Before any drawings are made, the writers create the story.

Man: So the plot comes before the artists begin?

Woman: Exactly. After the story is set, the scenes are planned and the artists begin their work.

Man: When do they add the voices and music?

Woman: Usually after the main scenes are prepared. Sound effects, voices, and music are added to make the pictures more lively and to strengthen what the audience sees and hears.

Woman: Look at all these red and yellow leaves around the trail.

Man: This is the best part of walking through the woods in autumn.

Woman: It really is beautiful here.

Man: The trees only look like this for a few weeks each year.

Woman: You mean when the leaves change color before they fall?

Man: Right, that's one reason I like this season.

Woman: Why do the leaves turn red and yellow?

Man: As fall begins, there are fewer hours of daylight. With less light, the green chlorophyll breaks down, and the other colors become visible.

Man: So the color change is really a chemical process in the leaves.

Woman: Maybe so, but I don't need the whole scientific explanation. I just like the way they look.

Speaker: Many people think air conditioning simply means cooling a room. In fact, its broader purpose is to control the indoor environment so that people can work and live comfortably.

Speaker: An air-conditioning system controls not only temperature but also humidity. It can remove moisture from the air when the air is too damp, and it can add moisture when the air is too dry.

Speaker: Ventilation is also important. Stale air is taken out of a room and replaced with fresh air from outside.

Speaker: In winter, the same basic principles are used. The system still controls temperature, moisture, and ventilation, although the temperature adjustment may involve heating rather than cooling.

Speaker: When the indoor environment is properly controlled, workers are less affected by heat, stale air, or excessive humidity. As a result, they often feel more alert.

29. The Great Depression serves as(A) an example of drama(B) fluctuations in the balanced(C) wage rate(D).

30. In some states, it has(A) against the law(B) to ride(C) a motorcycle without a(D) helmet.

31. The government provides(A) financial support for people(B) who are unable(C) to support themselves(D).

32. Robert Merton studied(A) how does(B) society influences(C) the development(D) of science.

33. The available(A) of credit influences(B) the rate of economic growth and the increase(C) in prices(D).

34. Pasteurization is the process of heating(A) milk to destroy(B) disease-caused(C) organisms and bacteria(D).

35. Paul Claudel, who written(A) books about his personal(B) feelings(C), was a leading(D) French author of the early 1900s.

36. Astronomers do not have sufficient information(A) to determine(B) what(C) the solar system was created(D).

37. The soil and climate in the tropics are not suit(A) to produce(B) large quantities(C) of grain(D).

38. Some species of(A) bats are dormant(B) each days(C) and active every night(D).

39. Paper was so expensive(A) during the Middle Ages that it has(B) to be used(C) sparingly(D).

40. Additives are chemicals(A) that are infused into(B) substances to preventing(C) them from

spoiling(D).

Reading Comprehension

Time 55 minutes

DIRECTIONS: In this section you will read several passages. Each passage is followed by a series of questions. For questions 1-50, you need to select the best answer, (A), (B), (C), or (D), to each question. Then, on your answer sheet, find the number of the question and fill in the space that contains the letter of the answer you have selected. Fill in the space completely. Answer all questions following a passage on the basis of what is stated or implied in the passage.

Read the following passage:

A tomahawk is a small ax used as a tool and a weapon by the North American Indian tribes. An average tomahawk was not very long and did not weigh a great deal. Originally, the head of the tomahawk was made of a shaped stone or an animal bone and was mounted on a wooden handle. After the arrival of the European settlers, the Indians began to use tomahawks with iron heads. Indian males and females of all ages used tomahawks to chop and cut wood, pound stakes into the ground to put up wigwams, and do many other chores. Indian warriors relied on tomahawks as weapons and even threw them at their enemies. Some types of tomahawks were used in religious ceremonies. Contemporary American idioms reflect this aspect of American heritage.

EXAMPLE I

Early tomahawk heads were made of

- (A) stone or bone
- (B) wood or sticks
- (C) European iron
- (D) religious weapons

According to the passage, early tomahawk heads were made of stone or bone. Therefore, the correct answer is (A).

EXAMPLE II

How has the Indian use of tomahawks affected American daily life today?

- (A) Tomahawks are still used as weapons.
- (B) Tomahawks are used as tools for certain jobs.
- (C) Contemporary language refers to tomahawks.
- (D) Indian tribes cherish tomahawks as heirlooms.

The passage states, "Contemporary American idioms reflect this aspect of American heritage." The correct answer is (C). After you read the directions, begin work on the questions.

Questions 1-10

The Globe Theater, where most of Shakespeare's plays were staged and performed, was located in London. Cuthbert and Richard Burbage built the theater in 1599 with materials left over from the construction of London's first playhouse, the Theater. They constructed the Globe on the south side of the Thames River in the little town of Southwark and counted

on making the theater a draw for the locals. Little is known about the architectural design of the theater except what can be deduced from maps and the layout of the plays presented there. It appears that the Globe was either round or polygonal on the outside but most likely round on the inside. In keeping with the contemporary imitations of Roman government buildings, its roof was most probably shaped as a crude dome. It can be further deduced that the structure was decorated with pediments, arches, columns, and ornate staircases with carvings of shells, feathers, and cupids. The size of its audience is projected at as many as 3,000 spectators both in the amphitheater and in the balcony. The Globe burned down in 1613; it was rebuilt on the same foundation a year later, but its external walls were curved at an angle different from that of the original. The theater was built hastily, and evidently safety was not a top priority for either the engineer or the company. After several nearly fatal accidents, the Globe was tom down for good in 1644.

1. This passage most likely came from a longer work on

- (A) English deductive trivia
- (B) English monumental constructions
- (C) the history of the English theater
- (D) notable English disasters

2. According to the passage, the Globe Theater was built

- (A) from available contemporary materials
- (B) from materials remaining from another project
- (C) on a foundation designed to meet a temporary need
- (D) with ornaments intended to fool the spectators

3. In line 5, the phrase "a draw" is closest in meaning to

- (A) an option
- (B) an attraction
- (C) a drawing
- (D) a donation

4. It can be inferred from the passage that the Globe's exact architectural design

- (A) should be reconstituted
- (B) should be obliterated
- (C) cannot be determined
- (D) cannot be disregarded

5. In line 8, the word "imitations" is closest in meaning to

- (A) enumeration
- (B) elimination
- (C) elaborations
- (D) emulation

6. In line 11, the word "projected" is closest in meaning to

- (A) calculated
- (B) confirmed
- (C) embellished
- (D) entrenched

7. The passage suggests that, for its time, the Globe Theater was

- (A) humble
- (B) harsh
- (C) austere
- (D) large

8. According to the passage, in how many buildings was the Globe Theater housed during its operation?

- (A) One
- (B) Two
- (C) Three
- (D) Four

9. The author implies that the last building housing the Globe was

- (A) dignified
- (B) unmistakable
- (C) hazardous
- (D) haunted

10. With which of the following statements is the author most likely to agree?

- (A) The architectural design of the theater was exemplary in the 1600s.
- (B) The builders did not invest a great deal of thought into the theater design.
- (C) The theater audience enjoyed plays, as well as the building design.
- (D) The theater location contributed to the opulence of its design and decorations.

Questions 11-22

Vitamins, taken in tiny doses, are a major group of organic compounds that regulate the mechanisms by which the body converts food into energy. They should not be confused with minerals, which are inorganic in their makeup. Although in general the naming of vitamins followed the alphabetical order of their identification, the nomenclature of individual substances may appear to be somewhat random and disorganized. Among the 13 vitamins known today, five are produced in the body. Because the body produces sufficient quantities of some but not all vitamins, they must be supplemented in the daily diet. Although each vitamin has its specific designation and cannot be replaced by another compound, a lack of one vitamin can interfere with the processing of another. When a lack of even one vitamin in a diet is continual, a vitamin deficiency may result.

The best way for an individual to ensure a necessary supply of vitamins is to maintain a balanced diet that includes a variety of foods and provides adequate quantities of all the com-

pounds. Some people take vitamin supplements, predominantly in the form of tablets. The vitamins in such supplements are equivalent to those in food, but an adult who maintains a balanced diet does not need a daily supplement. The ingestion of supplements is recommended only to correct an existing deficiency due to unbalanced diet, to provide vitamins known to be lacking in a restricted diet, or to act as a therapeutic measure in medical treatment. Specifically, caution must be exercised with fat-soluble substances, such as vitamins A and D, because, taken in, gigantic doses, they may present a serious health hazard over a period of time.

11. In line 1, the word "regulate" is closest in meaning to

- (A) control
- (B) refine
- (C) refresh
- (D) confine

12. According to the passage, vitamins are

- (A) food particles
- (B) essential nutrients
- (C) miscellaneous substances
- (D) major food groups

13. In line 4, the word "nomenclature" is closest in meaning to

- (A) conservation
- (B) classification
- (C) concentration
- (D) clarification

14. How many vitamins must be derived from nourishment?

- (A) 5
- (B) 7
- (C) 8
- (D) 13

15. The author implies that foods

- (A) supply some but not all necessary vitamins
- (B) should be fortified with all vitamins
- (C) are equivalent in vitamin content
- (D) supplement some but not all necessary vitamins

16. In line 7, the phrase "daily diet" is closest in meaning to

- (A) weight loss or gain.
- (B) sufficient quantities
- (C) nourishment intake

(D) vitamin tablets

17. A continual lack of one vitamin in a person's diet is

- (A) contagious
- (B) desirable
- (C) preposterous
- (D) dangerous

18. With which of the following statements would the author be most likely to agree?

- (A) A varied diet needs to be supplemented with vitamins.
- (B) An inclusive diet can provide all necessary vitamins.
- (C) Vitamins cannot be consistently obtained from food.
- (D) Vitamins should come from capsules in purified form.

19. It can be inferred from the passage that vitamin supplements can be advisable

- (A) in special medical cases
- (B) in most restricted diets
- (C) after correcting a dietary deficiency
- (D) before beginning a therapeutic treatment

20. In line 17, the phrase "act as" is closest in meaning to

- (A) play the role of
- (B) pretend to be
- (C) fight for
- (D) attest to the fact that

21. The author of the passage implies that

- (A) some vitamins are not fat-soluble
- (B) vitamins can be taken in very small doses
- (C) most vitamins are water-soluble
- (D) all vitamins are found in measured doses

22. What does the passage mainly discuss?

- (A) Adopting vitamins to control weight
- (B) The individual's diet for optimum health
- (C) Vitamin categorization and medical application
- (D) The place of vitamins in nutrition

Questions 23-33

When jazz began to lose its reputation as "low-down" music and to gain well-deserved acclaim among intellectuals, musicians began to feature many instruments previously consid-

ered inappropriate for jazz. Whereas before the 1950s, jazz musicians played only eight basic instruments in strict tempo, in this decade they started to improvise on the flute, electric organ, piccolo, accordion, cello, and even bagpipes, with the rhythm section composed for strings or piano. Big bands no longer dominated jazz, and most changes emerged from small combos, such as the Dave Brubeck Quartet and the Gerry Mulligan Quartet. The Gerry Mulligan Quartet proved that a small, modern band could sound complete without a piano; the rhythm section consisted only of a set of drums and a string bass. Jazz continued to move in new directions during the 1960s. Saxophonist and composer Ornette Coleman led a quartet playing "free" jazz that was atonal. Pianist Cecil Taylor also conducted similar experiments with music, and John Coltrane included melodies from India in his compositions. In the 1970s musicians blended jazz and rock music into fusion jazz which combined the melodies and the improvisations of jazz with the rhythmic qualities of rock 'n' roll, with three or five beats to the bar and in other meters. The form of jazz music was greatly affected by electric instruments and electronic implements to intensify, distort, or amplify their sounds. However, the younger musicians of the time felt compelled to include a steady, swinging rhythm which they saw as a permanent and essential element in great jazz

23. Which of the following would be the best title for the passage?

- (A) Popular Beats in Classical and Modern Jazz
- (B) Quintessential Moments in Jazz Music
- (C) The Achievements of Famous Jazz Musicians
- (D) The Rising Prestige and Diversity of Jazz

24. In line 2, the word "feature" is closest in meaning to

- (A) profess
- (B) prohibit
- (C) protest
- (D) promote

25. The paragraph preceding this passage would most likely describe

- (A) instruments used in jazz
- (B) instrumental pieces in jazz
- (C) jazz in the 1940s
- (D) the origins of jazz

26. The author of the passage implies that in the 1950s, jazz musicians

- (A) strictly adhered to its traditions and compositions
- (B) probably continued with its tempo and instrumentation
- (C) experimented with rhythm and instruments
- (D) increased the tempo to keep up with the changes

27. The author of the passage mentions all of the following EXCEPT

- (A) bagpipes
- (B) percussion

- (C) string bass
- (D) harpsichord

28. It can be inferred from the passage that small jazz bands

- (A) were dominated by large orchestras
- (B) consisted of drums and a string bass
- (C) were innovative in their music
- (D) included modern sound systems

29. The author believes that the developments in jazz described in the passage

- (A) should be seen as precocious.
- (B) should be considered influential
- (C) appear largely suggestive
- (D) may be perceived as discrete

30. The passage implies that representative jazz musicians

- (A) concentrated on melodious combinations of sounds
- (B) blended improvisations and sheet music together
- (C) created and modernized sophisticated devices
- (D) sought novel techniques in form and content

31. According to the passage, the changes in jazz music in the 1970s came from

- (A) another harmonious scale
- (B) another musical trend
- (C) ambitious aspirations
- (D) sound amplifications

32. In line 17, the word "compelled" is closest in meaning to

- (A) forced
- (B) challenged
- (C) obligated
- (D) censored

33. Which of the following best describes the organization of the passage?

- (A) Chronological innovations in jazz music
- (B) Definitions of diverse jazz styles
- (C) A classification of prominent jazz musicians
- (D) Descriptions and examples to illustrate jazz rhythms

Questions 34-41

The killdeer is a commonly found shore bird that inhabits the area between southern Can-

ada and South America. As with all plovers, its soft contour feathers with barbs and barbules impart a sleek appearance to its body while its down feathers insulate it from the winter cold and the summer heat. The male's loud shrill, which seems to say kill-deer, warns other males away from his territory. Ornithologists do not consider the killdeer a true songbird because its throat muscles are not structured to make melodious notes.

Killdeers are distinguished by the two black bands that mark their chest and neck.

Camouflaged by their protective grayish brown pigment, killdeers build nests that cradle the eggs and the young in shallow depressions in fields and open meadows. Because their nests lie directly on the ground, the young are able to run about as soon as they hatch. Killdeer are incubatory creatures and brood their own babies. When a predator approaches the nest or the bird's young, the mother tries to distract the intruder by dragging one of her wings as if it were injured. Farmers are particularly fond of killdeers because they feed on insects that damage crops. Because whole flocks of killdeers in the wild have vanished due to overhunting, game laws have been enacted to protect these plovers from poaching.

34. It can be inferred from the passage that killdeer usually live

- (A) in the brush
- (B) in mountains
- (C) near oceans
- (D) near cities

35. In line 3, the word "impart" is closest in meaning to

- (A) give
- (B) import
- (C) link
- (D) imprint

36. What is the reason given for the bird's name?

- (A) It has distinctive bands.
- (B) It has a peculiar song.
- (C) It kills young deer.
- (D) It eats deer fodder.

37. In line 6, the word "melodious" is closest in meaning to

- (A) memorable
- (B) musical
- (C) mellow
- (D) marvelous

38. It can be inferred from the passage that killdeers are

- (A) inarticulate
- (B) inconspicuous
- (C) irreverent
- (D) irresolute

39. How does the mother bird mislead its enemies?

- (A) By pretending to be vulnerable
- (B) By blending in with the background
- (C) By building low-lying nests
- (D) By scaring them away with her cry

40. According to the passage, farmers

- (A) form foundations to protect killdeer
- (B) appreciate the effects of killdeer
- (C) camouflage killdeer nests and eggs
- (D) provide killdeer with food and insects

41. Which of the following best describes the author's attitude toward the killdeer?

- (A) Menacing
- (B) Warm
- (C) Detached
- (D) Humorous

Questions 42-50

In 1752, Benjamin Franklin made his textbook experiment with a brass key and a silk kite that he flew in a thunderstorm to prove that lightning and electricity are the same thing. In 1920, a kite-flying championship for families and individuals was held in London. These two seemingly unrelated events underscore the fact that kites can be flown for both pleasure and scientific purposes. For example, in the 1800s weather bureaus flew kites to record temperature and humidity at certain altitudes. On one occasion, ten kites were strung together and flown at a height of four miles to lift men and carry cameras aloft. The kite's ability to fly depends on its construction and the way that its line is attached. The familiar diamond-shaped kite flies when its covered face is aligned against the wind flow. The line attached to the nose of the kite pulls it into the wind, thus creating the necessary angle for the lift force. If the kite's construction and the angle of the air stream are correct, the kite will encounter greater pressure against its face and lower pressure against its back. The difference in the pressure creates a lift that causes the kite to rise until it hangs level from its bridle. Its angle against the wind should be sufficiently large or small to create maximum lift to overcome both drag and gravity. The towing point to which the line is attached is important because it sets the kite's angle relative to the air flow. Although the kite must be headed up and into the wind with a velocity of 8 to 20 miles per hour, it can maintain its position through a tail, a rudder, a keel, vents, or tassels.

42. What is the main topic of the passage?

- (A) How kites can be utilized
- (B) Why kites were spurned
- (C) What parts kites consist of
- (D) What makes kites stay aloft

- 43.** In line 1, the word "textbook" is closest in meaning to
- (A) textual
 - (B) tentative
 - (C) classic
 - (D) outrageous
- 44.** In line 4, the word "seemingly" is closest in meaning to
- (A) ostensibly
 - (B) oncoming
 - (C) optimistic
 - (D) opposite
- 45.** In line 7, the word "aloft" is closest in meaning to
- (A) in flight
 - (B) in the flood
 - (C) for the analysis
 - (D) for amusement
- 46.** According to the passage, the kite flies when its nose is
- (A) pointed away from the ground
 - (B) pointed into the wind flow
 - (C) balanced with the tail
 - (D) aligned parallel to the wind flow
- 47.** What is the necessary condition for the kite to fly?
- (A) The kite must be sufficiently strong to withstand great pressure.
 - (B) The kite must be diamond-shaped, and the wind of a certain velocity.
 - (C) The pressure against its back must be lower than the pressure against its face.
 - (D) The pressure of the air flow must be lower than the weight of the kite.
- 48.** According to the passage, the line of the kite is important because it
- (A) lifts the kite's cover and frame into the air space
 - (B) contributes to the shape of the kite and extends it
 - (C) determines the angle between the kite and the air flow
 - (D) conveys the direction of the wind and the air flow
- 49.** In line 17, the phrase "headed up" is closest in meaning to
- (A) diverted
 - (B) deviated
 - (C) directed
 - (D) drafted

50. The paragraph following the passage most would likely discuss

- (A) fiberglass kites flown in competitions
- (B) the cords and wires needed for kite flying
- (C) bowed kites curved on their faces
- (D) elements of kite design and composition
