Listening Comprehension

Part A

DIRECTIONS: In Part A you will hear short conversations between two speakers. At the end of each conversation, a third speaker will ask a question about what the first two speakers said. Each conversation and each question will be spoken only one time. Therefore, you must listen carefully to understand what each speaker says. After you hear a conversation and the question, read the four choices and select the one that is the best answer to the question the speaker asked. Then, on your answer sheet, find the number of the question and blacken the space that corresponds to the letter for the answer you have chosen. Blacken the space completely so that the letter inside the space does not show.

Listen to the following example.

On the recording, you hear:

(Man) Does the car need to be filled?

(Woman) Mary stopped at the gas station on her way home.

(Narrator) What does the woman mean?

In your test book, you will read:

(A) Mary bought some food.

(B) Mary had car trouble.

(C) Mary went shopping.

(D) Mary bought some gas.

From the conversation you learn that Mary stopped at the gas station on her way home. The best answer to the question "Does the car need to be filled?" is (D), "Mary bought some gas." Therefore, the correct answer is (D).

Now let us begin Part A with question number 1.

Guide: Welcome to the marine mammal exhibit. Today we're going to talk about dolphins and some of their special features.

Student: I know dolphins live in water, but they aren't fish, right?

Guide: That's right. Dolphins are mammals. They breathe air, give birth to live young, and nurse their babies. They are also very social and intelligent animals.

Student: How long do baby dolphins stay with their mothers?

Guide: Usually for almost a year. During that time, the mother protects the calf and teaches it how to swim, feed, and stay with the group.

Student: Do dolphins communicate with each other?

Guide: Yes. They use a variety of sounds, such as whistles and clicks. These sounds help them identify one another, stay together, and sometimes warn the group of danger.

Student: That's amazing. I didn't realize they relied so much on sound.

Guide: Sound is extremely important to dolphins, especially because they often need to communicate underwater where visual contact may be limited.

31.

- (A) The life of sociable creatures
- (B) Special features of dolphins
- (C) The differences between fish and dolphins
- (D) Communication between groups of dolphins

32.

- (A) In a museum
- (B) On a seashore
- (C) In a laboratory
- (D) At a zoo

33.

- (A) For about 2 months
- (B) For almost 12 months
- (C) Approximately 2 years
- (D) Approximately 20 years

34.

- (A) By visual contact
- (B) By sounds
- (C) Through warning one another
- (D) With the help of scientists

Student: Professor, I use a dictionary all the time, but sometimes it seems to make reading more confusing instead of easier.

Professor: That can happen. Dictionaries are very useful, but students need to understand both their benefits and their pitfalls.

Student: What do you mean by pitfalls?

Professor: A dictionary may give several definitions for one word, and not every definition fits the sentence you are reading. If you do not understand the word's usage in context, you may choose the wrong meaning.

Student: So dictionaries do not solve everything automatically.

Professor: Exactly. There are also different kinds of dictionaries. General dictionaries are useful for everyday vocabulary, while specialized dictionaries are designed for fields like medicine, law, engineering, or linguistics.

Student: Did you learn that from studying vocabulary?

Professor: I learned it most clearly when I taught a reading class. Students often had dictionaries, but they still misunderstood passages because they looked up words without considering grammar, usage, or context.

Student: So a dictionary helps only if the learner already knows how to use it effectively.

Professor: That's the point. A dictionary is a tool, not a substitute for understanding word usage.

35.

- (A) The contents and structure of dictionaries
- (B) The benefits and pitfalls of dictionary use
- (C) The acquisition of words in dictionaries
- (D) The various applications of dictionary entries

36.

- (A) Formal and technical
- (B) General and specialized
- (C) Small and unabridged
- (D) American and English

37.

- (A) Took a writing class
- (B) Used a technical dictionary
- (C) Studied many new words
- (D) Taught a reading class

38.

- (A) Learners need to abandon dictionaries when their vocabulary increases.
- (B) Teachers think that students shouldn't always depend on dictionaries.
- (C) One can't use a dictionary effectively without knowing word usage.
- (D) Although dictionaries contain many entries, some word definitions can be irrelevant.

Part C

DIRECTIONS: In Part C you will hear short lectures and extended conversations. At the end of each, you will be asked several questions. Each lecture or conversation and each question will be spoken only one time. For this reason, you must listen carefully to understand what each speaker says. After you hear a question, read the four choices and select the one that best answers the question the speaker asked. Then, on your answer sheet, find the number of the question and blacken the space that contains the letter for the answer you have chosen. Answer all questions according to what is stated or implied in the lecture or conversation.

Listen to this sample talk.

You will hear:

Now listen, to the following example.

You will hear:

You will read:

- (A) By cars and carriages
- (B) By bicycles, trains, and carriages
- (C) On foot and by boat
- (D) On board ships and trains

The best answer to the question "According to the speaker, how did people travel before the

invention of the automobile?" is (B), "By bicycles, trains, and carriages." Therefore, the correct answer is (B). You are not allowed to make notes during the test.

Speaker: Today we will discuss Lake Ontario, one of the five Great Lakes of North America. Although Lake Ontario is important historically and geographically, it is the smallest of the Great Lakes. It is located east of Lake Erie and is connected to the Atlantic Ocean through the St. Lawrence River system.

Lake Ontario is smaller and generally has less shipping traffic than some of the other Great Lakes, especially compared with those more heavily used for large-scale industrial transportation. Its length is about 193 miles, and its shoreline is approximately 480 miles. The lake also has an important effect on the surrounding region's climate. Because large bodies of water heat and cool more slowly than land, Lake Ontario helps moderate weather patterns near its shores. This influence can reduce temperature extremes and affect local seasonal conditions.

39.

- (A) It's the northern.
- (B) It's the southern.
- (C) It's the deepest.
- (D) It's the smallest.

40.

- (A) It's heavily traveled all year round
- (B) It's not navigable for large boats.
- (C) It has less traffic than the other Great Lakes.
- (D) Its shores are inaccessible for landing.

41.

- (A) 53 miles
- (B) 193 miles
- (C) 480 miles
- (D) 7,500 miles

42.

- (A) Its water is used for irrigation of trees.
- (B) It moderates the weather patterns in the region.
- (C) It cools the air in the surrounding areas.
- (D) It has a considerable capacity to store water.

Speaker: Edgar Allan Poe, one of the most important figures in American literature, was born in Boston in 1809. After the death of his mother and the disappearance of his father, Poe was taken in by John and Frances Allan of Richmond, Virginia. The Allans were a well-to-do

family, and Poe grew up with access to education and social opportunities that many children did not have.

When he was a child, Poe traveled with the Allan family to Britain, where he attended school for several years. He returned to the United States at about the age of eleven and later continued his studies in Richmond. Poe was considered a competent student, especially in languages and literature.

As a young man, he entered the University of Virginia. However, his time there was troubled. Poe became involved in gambling and accumulated debts. This caused serious conflict with John Allan and eventually contributed to Poe leaving the university.

43.

- (A) England
- (B) Scotland
- (C) Richmond
- (D) Boston

44.

- (A) They were well-to-do.
- (B) They didn't love young Poe.
- (C) They were English.
- (D) They abandoned him.

45.

- (A) 9
- (B) 11
- (C) 15
- (D) 18

46.

- (A) He was a competent student.
- (B) He preferred studying in the academy.
- (C) He did not do well in his academics.
- (D) He decided to travel to Scotland instead.

47.

- (A) John Allan could not afford Poe's education.
- (B) Poe became involved in gambling.
- (C) John Allan had to leave for England.
- (D) Poe decided to become a writer.

Speaker: In marketing, it is useful to distinguish advertising from publicity. Advertising consists of presentations or messages designed to promote a product, service, organization, or

idea. These messages are usually sent through mass media so that they can reach many people at the same time.

One key characteristic of advertising is that it is paid for. A company or sponsor buys space or time in a medium, such as television, radio, magazines, websites, or billboards. Because the sponsor pays for the message, the sponsor can usually control the content and timing of the presentation.

Publicity is different. Publicity may also bring attention to a product or organization, but it is not usually purchased in the same direct way. For example, a news story about a company may create publicity, but the company does not necessarily pay for the story as it would pay for an advertisement.

48.

- (A) It is nonpersonal.
- (B) It consists of presentations.
- (C) It cannot be bought.
- (D) It includes hamburgers and soft drinks.

49.

- (A) Product sponsors
- (B) Many people
- (C) TV viewers
- (D) Buyers of media time

50.

- (A) Advertising is paid for.
- (B) Advertising can be subject to skepticism.
- (C) Publicity reaches a greater audience.
- (D) Publicity usually benefits political leaders.

Reading Comprehension

Time 55 minutes

DIRECTIONS: In this section you will read several passages. Each passage is followed by a series of questions. For questions 1-50, you need to select the best answer, (A), (B), (C), or (D), to each question. Then, on your answer sheet, find the number of the question and fill in the space that contains the letter of the answer you have selected. Fill in the space completely. Answer all questions following a passage on the basis of what is stated or implied in the passage.

Read the following passage:

A tomahawk is a small ax used as a tool and a weapon by the North American Indian tribes. An average tomahawk was not very long and did not weigh a great deal. Originally, the head of the tomahawk was made of a shaped stone or an animal bone and was mounted on a wooden handle. After the arrival of the European settlers, the Indians began to use tomahawks with iron heads. Indian males and females of all ages used tomahawks to chop and cut wood, pound stakes into the ground to put up wigwams, and do many other chores. Indian warriors relied on tomahawks as weapons and even threw them at their enemies. Some types of tomahawks were used in religious ceremonies. Contemporary American idioms reflect this aspect of American heritage.

EXAMPLE I

Early tomahawk heads were made of

- (A) stone or bone
- (B) wood or sticks
- (C) European iron
- (D) religious weapons

According to the passage, early tomahawk heads were made of stone or bone. Therefore, the correct answer is (A).

EXAMPLE II

How has the Indian use of tomahawks affected American daily life today?

- (A) Tomahawks are still used as weapons.
- (B) Tomahawks are used as tools for certain jobs.
- (C) Contemporary language refers to tomahawks.
- (D) Indian tribes cherish tomahawks as heirlooms.

The passage states, "Contemporary American idioms reflect this aspect of American heritage." The correct answer is (C). After you read the directions, begin work on the questions.

Questions 1-12

Even with his diverse experience as an elected official at the state level, Andrew Johnson was the first president of the United States ever to be impeached, primarily because of his violent temper and unyielding stubbornness. His career started in 1828 with his election to the city council of Greenville, Tennessee, and after two years as an alderman, he took office as mayor. His advancements followed in rapid succession when he was elected to the Tennessee state senate, then as the state governor, and later to the U.S. House of Representatives for five consecutive terms.

In 1864, Johnson ran for the office of vice-president on the Lincoln-Johnson ticket and was inaugurated in 1865. After Lincoln's assassination six weeks into his term, Johnson found himself president at a time when southern leaders were concerned about their forced alliance with the northern states and feared retaliation for their support of the secession. Instead, however, with the diplomatic skill he had learned from Lincoln, Johnson offered full pardon to almost all Confederates on the condition that they take an oath of allegiance. He further reorganized the former Confederate states and set up legislative elections.

Congressional opposition to his peace-making policies resulted in gridlock between the House and Johnson, and the stalemate grew into an open conflict on the issue of the emancipation of slaves. While Johnson held the view that newly freed slaves lacked understanding and knowledge of civil liberties to vote intelligently, Congress overrode Johnson's veto of the Civil Rights Bill, which awarded them citizenship and ratified the Fourteenth Amendment. In the years that followed, Congress passed bills depriving the president of the power to pardon political criminals, stripping away his status of commander-in-chief, and taking away Johnson's right to dismiss civil and executive officers from their duties. Johnson vetoed each bill, and each veto was overridden. When Johnson dismissed the secretary of war, Edwin Stanton, Stanton refused to step down and was supported by the House of Representatives, which voted to impeach Johnson. At the trial, the Senate came one vote short of the two-thirds majority necessary to remove him from office. After Johnson's term expired, he returned to his home state, but in 1875 he was elected senator and went back to Washington to take his seat.

1. What does the passage mainly discuss?

Questions 13-24

Sex-trait stereotypes may be defined as a set of psychological attributes that characterize men more frequently than women. Thus, males are often described as ambitious, unemotional, and independent and, on the other hand, selfish, unrefined, and insensitive. Females are described as emotional, irrational, high-strung, and tentative. In spite of the egalitarian movement, recent studies have demonstrated that sex-trait stereotypes remain common among young adults today. In fact, such stereotyping has proved to be the psychological justification for social beliefs concerning the appropriateness of various activities for men and women that further perpetuate the different sex roles traditionally ascribed to men and women.

The awareness of sex-trait stereotypes in the United States develops in a linear fashion between the ages of four and ten. Generally, knowledge of male stereotypical characteristics develops earlier, whereas knowledge of female characteristics increases more rapidly between the ages of four and seven. While the reasons for this learning are not fully understood, evidence suggests that at the preschool level children's literature and television programs provide powerful models and reinforcement for stereotyped views.

Studies designed to compare sex-trait stereotypes cross-nationally show a high degree of correspondence in the characteristics ascribed to men and women. As findings have been obtained in other countries, two hypotheses have been advanced to explain the commonalities in sex trait stereotyping. One states that pancultural similarities play a role in the psychological characteristics attributed to men and women, and the second states that the general picture is one of cultural relativism.

- 13.** Which of the following is the best title for the passage?
- (A) A Relativist Perspective on Stereotyping
 - (B) The Pervasiveness of Sex-Trait Stereotypes
 - (C) A Unilateral Approach to Sex-Trait Stereotyping
 - (D) A Cross-examination of Stereotypical Behaviors
- 14.** In line 2, the word "ambitious" is closest in meaning to
- (A) enterprising
 - (B) ambiguous
 - (C) anxious

Questions 25-32

There are many reasons why food fads have continued to flourish. Garlic has long been touted as an essential ingredient of physical prowess and as a flu remedy, squash has been thought by some to cure digestive disorders, and red pepper has been alleged to promote endurance. The natural human desire for a simple solution to a difficult problem sets the stage for promoting miraculous potions, pills, and combinations of chemicals. The gullible individuals who eagerly embrace any second-hand information with scientific overtones provide the foundation for healthy business enterprises.

A person who has never crossed the threshold of a health food store may be astounded, be-

wildered, or overjoyed. Countless elixirs, herbs, powders, sweeteners, and other fascinating extracts are only a fraction of the high-profit selection. The available literature includes pamphlets extolling the amazing return of youth one can anticipate while drinking a potion steeped with tropical weeds, as well as volumes assuring the reader of an almost eternal longevity.

The store is directly keyed to arouse visitors' concern over their health and to capitalize on real and imagined problems by offering solutions that, incidentally, cost more than the customer may be able to afford. Health food store patrons are often cajoled into buying tonics that promise to make the functioning of healthy organs even better, regardless of whether an improvement is called for. Promotion of expensive products that consumers do not actually need takes considerable initiative and insight. On occasion, there may even be some slight disregard for truth in an entrepreneur's zeal to cure customers of ills for a price.

25. Which of the following is the main topic of the passage?

- (A) Invigorating claims regarding health food
- (B) Praising the health food store inventory
- (C) Proving the wonders of health food products
- (D) Marketing bogus miracles in health food stores

26. Which of the following best describes the author's tone?

- (A) Approving
- (B) Factual
- (C) Sarcastic
- (D) Hesitant

27. In line 2, the word "touted" is closest in meaning to

- (A) talked about
- (B) figured out
- (C) identified
- (D) known

28. Why does the author mention garlic and squash?

- (A) To explain their prevalence in diets of some ethnic groups
- (B) To promote their sales as healing agents for various ills
- (C) To compare them to modern and beneficial health products
- (D) To exemplify the persistence of misconceptions regarding food

29. Where in the passage does the author give reasons for the commercial success of the health food industry?

- (A) Lines 1-2
- (B) Lines 8-9
- (C) Lines 10-13
- (D) Lines 14-15

- 30.** In line 16, the word "cajoled" is closest in meaning to
- (A) trained
 - (B) frightened
 - (C) drilled
 - (D) coaxed
- 31.** It can be inferred from the passage that health food store operators are primarily concerned with
- (A) persuading their customers of the high quality of their wares
 - (B) arriving at long-term solutions for health maintenance
 - (C) maximizing profits by taking advantage of consumer naivete
 - (D) exposing the grave consequences of neglecting one's health
- 32.** The author would most probably agree with which of the following statements?
- (A) Health food articles are positively exotic and exorbitant.
 - (B) Promoting and selling health foods verges on cheating.
 - (C) Health food enterprises are dedicated to absolute honesty.
 - (D) Inducing patrons to buy health products is criminal at best.

Questions 33-41

Because geologists have long indicated that fossil fuels will not last indefinitely, the U.S. government finally acknowledged that sooner or later other energy sources would be needed and, as a result, turned its attention to nuclear power. It was anticipated that nuclear power plants could supply electricity in such large amounts and so inexpensively that they would be integrated into an economy in which electricity would take over virtually all fuel-generating functions at nominal costs. Thus, the government subsidized the promotion of commercial nuclear power plants and authorized their construction by utility companies. In the 1960s and early 1970s, the public accepted the notion of electricity being generated by nuclear reactors, and the Nuclear Regulatory Commission proceeded with plans for numerous nuclear power plants in or near residential areas. By 1975, 54 plants were fully operational, supplying 11 percent of the nation's electricity, and another 167 plants were at various stages of planning and construction. Officials estimated that by 1990 hundreds of plants would be on line, and by the turn of the century as many as 1,000 plants would be in working order.

Since 1975, this outlook and this estimation have changed drastically, and many utilities have canceled existing orders. In some cases, construction was terminated even after billions of dollars had already been invested. After being completed and licensed at a cost of almost \$6 billion, the Shoreham Power Plant on Long Island was turned over to the state of New York to be dismantled without ever having generated electric power. The reason was that residents and state authorities deemed that there was no possibility of evacuating residents from the area should an accident occur.

Just 68 of those plants under way in 1975 have been completed, and another 3 are still under construction. Therefore, it appears that in the mid 1990s, 124 nuclear power plants in the nation will be in operation, generating about 18 percent of the nation's electricity, a figure that will undoubtedly decline as relatively outdated plants are shut down.

- 33.** What was initially planned for the nation's fuel supply in the 1950s and in the early 1960s?
- (A) Expansion and renovation of existing fuel-generating plants
 - (B) Creation of additional storage capacities for fossil fuels
 - (C) Conversion of the industry and the economy to nuclear power
 - (D) Development of an array of alternative fuel and power sources
- 34.** How does the author describe the attitude of the population in regard to nuclear power as fuel in the early to mid 1970s?
- (A) Apprehensive
 - (B) Ambivalent
 - (C) Receptive
 - (D) Resentful
- 35.** In line 6, the word "nominal" is closest in meaning to
- (A) so-called
 - (B) minimal
 - (C) exorbitant
 - (D) inflated
- 36.** In line 8, the word "notion" is closest in meaning to
- (A) nonsense
 - (B) notice
 - (C) idea
 - (D) consequence
- 37.** In line 15, the phrase "this outlook" refers to
- (A) the number of operating nuclear plants
 - (B) the expectation for the increase in the number of nuclear plants
 - (C) the possibility of generating electricity at nuclear installations
 - (D) the forecast for the capacity of the nuclear plants
- 38.** It can be inferred from the passage that government-officials made a critical error in judgment by
- (A) disregarding the low utility of nuclear power plants
 - (B) relying on inferior materials and faulty plant design
 - (C) overlooking the possibility of a meltdown, however remote
 - (D) locating installations in densely wooded areas
- 39.** The author of the passage implies that the construction of new nuclear power plants
- (A) is continuing on a smaller scale
 - (B) is being geared for greater safety

- (C) has been completely halted for fear of disaster
- (D) has been decelerated but not terminated

40. Which of the following best describes the organization of the passage?

- (A) The exposition of the public opinion polls on nuclear power
- (B) A narration of power-source deliberation in nuclear power plants
- (C) Causal connections in the government's position on nuclear power
- (D) Point and counterpoint in the nuclear power debate

41. The author of the passage implies that the issue of finding adequate sources of fuel and power for the future

- (A) has long been ignored by short-sighted government authorities
- (B) may be condoned by vacillating officials
- (C) has lost its pertinence in light of new discoveries
- (D) has not yet been satisfactorily resolved

Questions 42-50

Collecting maps can be an enjoyable hobby for antiquarian booksellers, a captivating interest for cartographers, a lucrative vocation for astute dealers, and an inspirational part of the occupational functioning of map catalogers, archivists, and historians. Among recognized collectibles, maps are relatively rarer than stamps, but they have had their avid enthusiasts and admirers ever since copies were made by hand only for the affluent, the commanding officer, and the ship captain.

Whether the interest is business-related or amateur, the economic means abundant or slim, a collection needs a theme, be it associated with contemporary changes in cartographic representation or geographic knowledge, or a more accessible goal centered on a particular mapmaker, technique, or type of subject matter. Collectors should not overlook topical maps issued predominantly or exclusively after World War II, such as navigational charts, industrial compound road layouts, or aerial projections. Potential collectors ought not to disregard two superficially prosaic, yet important themes: maps of travel routes for family trips, and maps that, for aesthetic reasons, they personally find intriguing or simply attractive. In the first case, like the box with old family photos, the collection will give the travelers the opportunity to reminisce and relive the journey.

In most cases, photocopies are worthy alternatives to originals. For example, historical society collections customarily include the high quality facsimiles needed to make a collection as comprehensive and practical as possible, supplementing the contributions made by well-to-do donors and benefactors. If not predisposed to wait patiently, and possibly ineffectually, for a lucky find, collectors may choose to sift through dealer stock, peruse through advertisements in local, regional, or national periodicals, and solicit the assistance of the U.S. Library of Congress and private agencies. Government and public agencies, companies, and trade associations can advise the collector about maps currently in circulation and pending sales of dated reproductions, editions, and prints.

42. What is the main idea of the passage?

- (A) Why hobbyists always flaunt their map collections
- (B) How maps can be collected by professionals and enthusiasts

- (C) How to assure an uninterrupted flow of collectibles
 - (D) What cartographers advocate as a worthy undertaking
- 43.** In line 2, the word "lucrative" is closest in meaning to
- (A) instructive
 - (B) insensitive
 - (C) profitable
 - (D) profuse
- 44.** According to the passage, map collecting as a hobby is
- (A) not deserving of the time and resources
 - (B) not as conventional as collecting stamps
 - (C) as eccentric as collecting dolls
 - (D) conformist in the best sense of the word
- 45.** It can be inferred from the passage that, at a time when maps were accessible to the upper socioeconomic classes, they appealed also to a fair number of
- (A) professional copiers
 - (B) ardent devotees
 - (C) buried-treasure hunters
 - (D) obscure amateur dealers
- 46.** In line 7, the phrase "economic means" is closest in meaning to
- (A) economic maps
 - (B) fiscal responsibility
 - (C) available funds
 - (D) capital investment
- 47.** The author of the passage mentions all of the following as sources of procuring maps EXCEPT:
- (A) fellow collectors
 - (B) map vendors
 - (C) personal archives
 - (D) publishers
- 48.** In line 13, the author uses the phrase "superficially prosaic" to mean
- (A) described in informal prose
 - (B) seemingly boring and unimaginative
 - (C) useful for travelers who enjoy a change
 - (D) potentially uncovered in a box of photos
- 49.** In line 20, the word "predisposed" is closest in meaning to

- (A) pressured
- (B) provoked
- (C) condemned
- (D) inclined

50. A paragraph following the passage would most likely discuss

- (A) specific organizations to contact about map acquisition
- (B) specific mapping techniques used to enlarge the scale
- (C) trimming and framing valuable acquisitions
- (D) volunteering time and work to maintain obsolete maps
