Reading Comprehension

Time 55 minutes

DIRECTIONS: In this section you will read several passages. Each passage is followed by a series of questions. For questions 1-50, you need to select the best answer, (A), (B), (C), or (D), to each question. Then, on your answer sheet, find the number of the question and fill in the space that contains the letter of the answer you have selected. Fill in the space completely. Answer all questions following a passage on the basis of what is stated or implied in the passage.

Read the following passage:

A tomahawk is a small ax used as a tool and a weapon by the North American Indian tribes. An average tomahawk was not very long and did not weigh a great deal. Originally, the head of the tomahawk was made of a shaped stone or an animal bone and was mounted on a wooden handle. After the arrival of the European settlers, the Indians began to use tomahawks with iron heads. Indian males and females of all ages used tomahawks to chop and cut wood, pound stakes into the ground to put up wigwams, and do many other chores. Indian warriors relied on tomahawks as weapons and even threw them at their enemies. Some types of tomahawks were used in religious ceremonies. Contemporary American idioms reflect this aspect of American heritage.

EXAMPLE I

Early tomahawk heads were made of

- (A) stone or bone
- (B) wood or sticks
- (C) European iron
- (D) religious weapons

According to the passage, early tomahawk heads were made of stone or bone. Therefore, the correct answer is (A).

EXAMPLE II

How has the Indian use of tomahawks affected American daily life today?

- (A) Tomahawks are still used as weapons.
- (B) Tomahawks are used as tools for certain jobs.
- (C) Contemporary language refers to tomahawks.
- (D) Indian tribes cherish tomahawks as heirlooms.

The passage states, "Contemporary American idioms reflect this aspect of American heritage." The correct answer is (C). After you read the directions, begin work on the questions.

Questions 1-10

Free-standing sculpture that is molded or carved is a type familiar to almost everyone.

Although certain free-standing figures or groups of figures can have only a single side intended for viewing, others are completed on all sides. As with all other forms of art, the ultimate shape of a sculpture reflects the artist's vision of individuals or experiences represented by the work. Throughout history, people everywhere have discovered a need for sculpture as a record of events and feelings.

Materials which can be sculpted do much to contribute to the artist's imagination.

Wood, stone, metal, and various types of plastic and synthetics are all used as sculpting media. When sculptures are made of stone, wood, ivory, or even ice, the sculptor carves or chips the substance to reduce it to the necessary shape. Developing a sculptured image on all sides represents a change from the older approach when artists left the back portion of the figure unfinished and rough. In fact, sculpture in relief is completely attached to the flat background material and appears to be a part of it. Relief, which is completed only on one side intended for viewing, was the first type of sculpture created by man, when ancient sculptors removed the background material in a side of a tree or a cave to make their drawing appear more realistic.

While creating a statue, the artist depends on the appropriate lighting to develop the figure because the quality of the final product relies on the interplay between light and shade.

When the work is finished, the sculpture must be displayed in the same light as it was originally created. If a light from a source is too weak or too strong, the effect that the sculptor intended may be lost. For example, in painting, the light and shade give the image shape and solidity that cannot be altered by an external light in which it is displayed. When a sculpture is exhibited, the artist's work is brought to life by light, and its character can be altered by the control of the light source. A fundamental difference between a painting and a sculpture is that when viewing a painting, the audience can only see the point of view that the painter had intended. A free-standing sculpture can be seen from practically any angle. The job of the sculptor is then to attain the quality and the volume of the image from any possible point of

view.

In addition to carving a work, sculptures can be cast. In the process of casting, a sculpture can be reproduced in a mold when a liquefied medium is poured into a shape. After the material from which the sculpture is made hardens, the mold is removed, and the work is cleaned of the excess and polished. Casting allows the artist to produce as many replicas as needed. Most commercially sold sculptures are made in this way. Casting metals requires special care and skill. Bronze is the preferred metal because of its versatility and malleability. To make bronze sculpture, the space in a mold is filled with wax until it is melted by the heated metal. This process, sometimes called lost-wax, was favored by Benvenuto Cellini and was common among the artists in ancient China.

Questions 11-21

The Beatles became the most popular group in rock music history. This quartet of extraordinarily talented musicians generated a phenomenal number of pieces that won gold records. They inspired a frenzy that transcended countries and economic strata. While all of them sang, John Lennon and Paul McCartney wrote the majority of their songs. Originally, Lennon and five others formed a group called the Quarrymen in 1956, with McCartney joining them later that year. George Harrison, John Lennon, and Paul McCartney, together with Stuart Sutcliffe, who played the bass guitar, and Pete Best on the drums, performed together in several bands for a few years, until they finally settled on the Silver Beatles in 1960. American rock musicians, such as Chuck Berry and Elvis Presley, influenced Lennon's and McCartney's music, whose first hits consisted of simple tunes and lyrics about young love, "Love Me Do" and "Please, Please Me." The Beatles' U.S. tour propelled them to stardom and led to two movies *A Hard Day's Night* and *Help!*, filmed in 1964 and 1965. The so-called British invasion of the United States was in full swing when they took the top

five spots on the singles charts, followed by the release of their first film. During the 1960s, their music matured and acquired a sense of melody. The lyrics of their songs became deeper and gained in both imagination and meaning. Their popularity continued to grow as the Beatles turned their attention to social problems and political issues in "Nowhere Man" and "Eleanor Rigby." Loneliness and nostalgia come through in their ballads "Michelle" and "Yesterday," which fully displayed the group's professional development and sophistication. Lennon's sardonic music with lyrics written in the first person, and McCartney's songs that created scenarios with off beat individuals, contributed to the character of the music produced by the group. In addition to their music, the Beatles set a social trend that popularized long hair, Indian music, and mod dress. For a variety of reasons, the musicians began to drift apart, and their last concert took place in San Francisco in 1966. The newspapers and tabloids publicized their quarrels and lawsuits, and the much idolized group finally disbanded in 1970. However, their albums had outsold those of any other band in history. Although all of the Beatles continued to perform solo or form new rock groups, alone, none could achieve the recognition and success that they had been able to win together.

11. What does the passage mainly discuss?

- (A) The history and music of the Beatles
- (B) The history and milestones of rock
- (C) The fashion and music popular in the 1960s
- (D) The creation and history of a music group

12. According to the passage, how many members were in the band, formed in 1956?

- (A) Four
- (B) Five
- (C) Six
- (D) Seven

13. According to the passage, which of the Beatles had the greatest musical talent?

- (A) John Lennon and Paul McCartney
- (B) George Harrison and John Lennon
- (C) Stuart Sutcliffe and Pete Best
- (D) John Lennon, Paul McCartney, and George Harrison

14. The author of the passage implies that the Beatles

- (A) competed with American musicians
- (B) wrote their music as a group
- (C) became popular relatively quickly
- (D) were active in social movements

15. According to the passage, the Beatles' fame grew as a result of

- (A) Chuck Berry's involvement
- (B) their American tour

- (C) two movies made in the U.S.
- (D) their first two hits

16. The author of the passage implies that over time, the music and lyrics by the Beatles

- (A) became more complex than at the beginning of their career
- (B) declined in quality and political significance
- (C) were dedicated to women named Eleanor and Michelle
- (D) made them the richest musicians in the world

17. The word "acquired" in line 12 is closest in meaning to

- (A) imparted
- (B) attached
- (C) imprinted
- (D) attained

18. According to the passage, when did the Beatles experience their greatest success?

- (A) In the late 1950s.
- (B) After their break-up in 1970.
- (C) During the early and mid-1960s.
- (D) Throughout their lifetimes.

19. The word "scenarios" in line 16 is closest in meaning to

- (A) sceneries
- (B) situations
- (C) life stories
- (D) love themes

20. According to the passage, how did Lennon and McCartney enhance the music of the group?

- (A) They struggled to reach stardom in the United States.
- (B) They composed lyrics to scornful songs and ballads.
- (C) Their music added distinctiveness to the Beatles' repertoire.
- (D) Their loneliness and sadness made their music popular.

21. In line 21, the word "disbanded" is closest in meaning to

- (A) separated
- (B) slipped
- (C) revelled
- (D) bonded

Questions 22-31

Like Europeans who arrived in the Americas, the first American Indians were 'immigrants. Because

Indians were nomadic hunters and gatherers, they probably arrived in search of new hunting grounds from Asia when they crossed the ice-covered Bering Strait to Alaska. Anthropologists estimate that the entire Indian population north of Mexico was slightly greater than 1,020,000 when the first settlers arrived from Europe. Although Native Americans belonged to one geographic race, their cultures and languages were only marginally similar, and by and large, they had different ways of life. Nomadic migrations required Indians to construct shelters that did not need to be transported, but could be easily erected from the materials found in their new location.

Eastern Woodland Indian tribes lived in bark-covered wigwams that were shaped like cones or domes. The frame for the hut was made of young trees firmly driven into the ground, and then bent overhead to tie together with bark fibers or strings of animal hides. Sheets and slabs of bark were attached to the frame to construct the roof and walls, leaving an opening to serve as a door and to allow smoke to escape. The Iroquois in north eastern regions built longhouses that were more spacious than wigwams because five to a dozen families lived under one roof. During the winter, they plastered clay to the poles of the frame to protect the inhabitants from wind and rain.

Pueblo Indians who lived in the southwest portion of the United States in northern Arizona and New Mexico constructed elaborate housing with several stories and many rooms.

Each family unit had only one room, and their ancestors dug shelters in the walls of cliffs and canyons. The ground story of a Pueblo dwelling had no doors or windows in order to prevent enemies from entering. The next level was set back the width of one room, and the row of rooms above it was set back once again, giving their houses the appearance of a terrace. Pueblos used ladders to climb to the upper levels and pulled them in when all family members returned for the night.

Indians living in deserts used sandstone and clay as construction materials. Those who lived in the valleys of rivers even made bricks of clay with wood chips to add strength and to prevent the clay from cracking. To make roofs, Pueblos tied logs together to make rafters and laid them across the two outside walls. On top of the rafters, layers of tree branches, sticks, grass, and brush created a solid roof to preclude the water from leaking inside. Pueblo dwellings were dark because windows were often not large enough to allow much light.

22. What does the passage mainly discuss?

- (A) Different Indian tribes
- (B) Types of households among Indians
- (C) Types of shelters built by Indians
- (D) Different Indian cultures

23. In line 3, the word "marginally" is closest in meaning to

- (A) markedly
- (B) minimally
- (C) temporarily
- (D) tentatively

24. In line 4, the phrase "by and large" is closest in meaning to

- (A) mostly
- (B) conversely
- (C) occasionally

(D) notably

25. The author of the passage implies that Indians

- (A) carried their construction materials to new locations
- (B) lived in settlements, similar to the Europeans
- (C) liked the climate in the Southwest
- (D) constructed shelters every time a tribe moved

26. According to the passage, what shape did the shelters of Woodland Indians have?

- (A) random
- (B) round
- (C) rectangular
- (D) convex

27. The author of the passage implies that Eastern Indians

- (A) constructed huts without roofs
- (B) planted trees to harvest crops
- (C) made fires inside their huts
- (D) used sheets and blankets as bedding

28. In line 12, the phrase "under one roof" is closest in meaning to

- (A) in separate sections
- (B) in several shelters
- (C) comfortably
- (D) together

29. What was the main difference between the dwellings of Pueblo and Woodland Indians?

- (A) The Pueblos lived in permanent structures, but the Woodland Indians lived in transient shelters.
- (B) The Pueblos used wood in their constructions, but the Woodland Indians relied mostly on animal hides.
- (C) The Woodland Indians lived on flat ground, but the Pueblos lived in canyons.
- (D) The Woodland Indians built small shelter.

30. It can be inferred from the passage that Pueblo dwellings were designed to protect inhabitants from

- (A) attacks by enemies and cold winters
- (B) attacks by enemies and against rain water
- (C) wind storms and water from rain
- (D) wild animals, cold winters, and desert sands

31. The word "preclude" in line 24 is closest in meaning to

- (A) include
- (B) stop
- (C) preserve
- (D) conclude

Questions 32-42

Continents and ocean basins represent the largest identifiable bodies on Earth. On the solid portions of the planet, the second most prominent features are flat plains, elevated plateaus, and large mountain ranges. In geography, the term "continent" refers to the surface of continuous landmasses that together comprise about 29.2% of the planet's surface. On the other hand, another definition is prevalent in the general use of the term that deals with extensive mainlands, such as Europe or Asia, that actually represent one very large landmass. Although all continents are bounded by water bodies or high mountain ranges, isolated mainlands, such as Greenland and India-Pakistan areas are called subcontinents. In some circles, the distinction between continents and large islands lies almost exclusively in the (10) size of a particular landmass.

The analysis of compression and tension in the earth's crust has determined that continental structures are composed of layers that underlie continental shelves. A great deal of disagreement among geologists surrounds the issue of exactly how many layers underlie each landmass because of their distinctive mineral and chemical composition. It is also quite possible that the ocean floor rests on the top of unknown continents that have not yet been explored. The continental crust is believed to have been formed by means of a chemical reaction when lighter materials separated from heavier ones, thus settling at various levels within the crust. Assisted by the measurements of the specifics within crust formations by means of monitoring earthquakes, geologists can speculate that a chemical split occurred to form the atmosphere, sea water, and the crust before it solidified many centuries ago.

Although each continent has its special features, all consist of various combinations of components that include shields, mountain belts, intracratonic basins, margins, volcanic plateaus, and blockvaulted belts. The basic differences among continents lie in the proportion and the composition of these features relative to the continent size. Climatic zones have a crucial effect on the weathering and formation of the surface features, soil erosion, soil deposition, land formation, vegetation, and human activities.

Mountain belts are elongated narrow zones that have a characteristic folded sedimentary organization of layers. They are typically produced during substantial crustal movements, which generate faulting and mountain building. When continental margins collide, the rise of a marginal edge leads to the formation of large mountain ranges, as explained by the plate tectonic theory. This process also accounts for the occurrence of mountain belts in ocean basins and produces evidence for the ongoing continental plate evolution.

32. What does this passage mainly discuss?

- (A) Continental drift and division
- (B) Various definitions of the term "continent"
- (C) Continental structure and crust
- (D) Scientific analyses of continental crusts

33. According to the passage, how do scientists define continents?

- (A) As masses of land without divisions

- (B) As extensive bodies of land
 - (C) As the largest identifiable features
 - (D) As surficial compositions and ranges
- 34.** In line 5, the word "bounded" is closest in meaning to
- (A) covered
 - (B) convened
 - (C) delimited
 - (D) dominated
- 35.** The author of the passage implies that the disagreement among scientists is based on the fact that
- (A) each continent has several planes and shelves
 - (B) continents have various underlying layers of crust
 - (C) continents undergo compression and experience tension
 - (D) continents have different chemical makeup
- 36.** The word "specifics" in line 13 is closest in meaning to
- (A) specialties
 - (B) speculations
 - (C) exact details
 - (D) precise movements
- 37.** The word "it" in line 15 refers to
- (A) a chemical split
 - (B) the crust
 - (C) the atmosphere
 - (D) sea water
- 38.** The author of the passage implies that
- (A) it is not known exactly how the continental crust was formed
 - (B) geologists have neglected the exploration of the ocean floor
 - (C) scientists have concentrated on monitoring earthquakes
 - (D) the earth's atmosphere split into water and solids
- 39.** According to the passage, what are the differences in the structure of continents?
- (A) The proportional size of continents to one another
 - (B) Ratios of major components and their comparative size
 - (C) The distinctive features of their elements
 - (D) Climatic zones and their effect on the surface features
- 40.** In line 25, the phrase "This process" refers to

- (A) continental collision
- (B) mountain ranges
- (C) the rise of margins
- (D) plate tectonic theory

41. The author of the passage implies that

- (A) the process of mountain formation has not been accounted for
- (B) mountain ranges on the ocean floor lead to surface mountain building
- (C) faulting and continental margins are parts of plate edges
- (D) the process of continent formation has not been completed

42. The word "evidence" in the last line is closest in meaning to

- (A) eventuality
- (B) confirmation
- (C) exemplification
- (D) challenge

Questions 43-50

Chicago ranks as the leading industrial and urban center in North America. Carl Sandburg called it the "City of the Big Shoulders" primarily because in the 1930s, its population contained a large segment of industrial workers, the largest agricultural market, and a huge airport. This poetic phrase, however, does not do justice to the city's outstanding array of cultural institutions, such as the symphony orchestra and the museums of art and history. The downtown business district on the shore of Lake Michigan is the hub of fashionable and elegant boutiques, quaint restaurants, and high-rise office buildings. Lake Shore Drive extends to both the north and south ends of the city, making it one of the most spectacular roadways in the state of Illinois. The Old Water Tower, dwarfed by the John Hancock Center, is a must-see landmark frequented by thousands of tourists each year. Most of the Chicago lakefront is public, with spectacular beaches and wide lawns stretching along the shore line.

Throughout its history, Europeans streamed into the city in search of jobs in steel mills and factories. The large influx of population created tensions in various neighborhoods, and in the 1920s, Chicago gained a reputation for violence and crime that it never lived down. Nonetheless, the booming industries continued to attract new residents into the thriving city, despite its notoriety.

The Chicago metropolitan area has undergone dramatic changes since the 1940s when the suburban population almost doubled, and the number of city residents fell. Today, most of the city's ethnic enclaves have faded away, but their rich heritage remains. The residents take pride in impressive churches and blocks of homes constructed in the early 20th century by industrious European immigrants who built the city. More than 85% of Chicagoans were born in the United States, and access to Irish, Italian, Polish, and German community institutions and businesses is not as important to them as it was to their grandparents. Italian is no longer spoken in Little Italy, and Irish pubs have fewer Irish customers than those of mixed, typically American origins.

43. What does the passage mainly discuss?

- (A) Chicago's industrial and urban evolution
- (B) Cultural and tourist attractions in Chicago
- (C) The size of the city and its roadways
- (D) The spectacular arrays of buildings in Chicago

44. According to the passage, Carl Sandburg's phrase

- (A) describes the city in the best light
- (B) reflects the city in its entirety
- (C) overlooks many of Chicago's attractive features
- (D) gives an overview of Chicago's cultural life

45. The word "hub" in line 6 is closest in meaning to

- (A) hill
- (B) center
- (C) corner
- (D) home

46. The author of the passage implies that

- (A) the Old Water Tower is shorter than the John Hancock Center
- (B) the John Hancock Center is probably the tallest building in the city
- (C) the Old Water Tower and the John Hancock Center are located on the lake shore
- (D) the Old Water Tower and the John Hancock Center are easy to reach by one of the Illinois roadways

47. According to the passage, immigrants from Europe

- (A) arrived in Chicago by ships and boats
- (B) came to the city to enjoy its beaches
- (C) arrived in large numbers
- (D) came to Chicago to live in a large city

48. What changes have occurred in the city since the 1940s?

- (A) Many residents moved out to neighboring towns.
- (B) Its population grew rapidly.
- (C) Many residents forgot their ethnic heritage.
- (D) Its original builders moved back to Europe.

49. In line 20, the word "industrious" is closest in meaning to

- (A) employed in an industry
- (B) hard-working
- (C) ill-famed
- (D) employed in construction

50. According to the passage, currently most residents of Chicago

- (A) speak several languages
- (B) do not shop in local stores
- (C) do not have community institutions
- (D) predominantly speak English
